

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

MESSAGE FROM THE GOVERNOR.

The Sergeant-at-Arms announced,

A Message from His Excellency the Governor, which was presented by Mr. J. E. Norment, Private Secretary.

The Message was read, as follows:

MESSAGE.

To the Honorable, the Gentlemen of the General Assembly.

The annual meeting of your honorable body brings a season of responsible duties, of arduous labors. In accordance with the requirements of the Constitution, I herewith transmit to you my Annual Message, with the assurance that I am ready to cooperate with you in advancing the weal and the dignity of our commonwealth. As a matter of prime importance, I shall first direct your attention to the condition of our State's finances.

FINANCIAL CONDITION OF THE STATE.

For a number of years past the State has been under the necessity of borrowing money to meet its current expenses. The amount

borrowed has been annually increasing, until last year the State Treasurer was compelled to borrow the sum of \$500,000.00. The reason for this increase lies in the fact that since the year 1900 the expenditures of the State have annually exceeded the revenue.

In 1900 the expenditure exceeded the revenue by... \$10,045.42

In 1901 the expenditure exceeded the revenue by... 13,924.29

In 1902 the expenditure exceeded the revenue by... 208,795.23

In 1903 there was an apparent excess of revenue over expenditures amounting to \$56,304.29, but in reality the expenditures exceeded the revenue by \$32,833.57, for the reason that the sum of \$89,137.86 was then received in settlement of claims against the United States Government, and was placed in the General Fund. Last year again the expenditures exceeded the revenue by at least \$100,000.00, making a total excess of expenditure over revenue of \$365,598.51 for the past five years.

In 1903 the General Assembly, realizing that this condition of affairs should no longer exist, appointed a committee to consider "how best to put the State upon a cash basis, what additional sources of revenue for the State are available, and what changes should be made in existing laws for the assessment and collection of taxes."

This committee reported at your last session, making several recommendations, the only one adopted, however, being a license tax upon all corporations. This law becomes operative this year, and it is estimated that it will add \$80,000.00 to the State's revenue. The estimated revenue from the five-mill levy for the present fiscal year will be \$1,050,000.00. The insurance license fees and the fees from the office of the Secretary of State may be estimated at \$50,000.00. To this we may add \$80,000.00 from license fees, making a total revenue for 1905 of \$1,180,000.00.

It will thus be seen that, if the expenditures are the same as last year, there will again be a deficiency, with no provision made to place the State upon a cash basis.

In this connection I beg to call your attention to an Article of the Constitution: "The General Assembly shall provide for an annual tax sufficient to defray the estimated expenses of the State for each year, and whenever it shall happen that the ordinary expenses of the State for any year shall exceed the income of the State for such year, the General Assembly shall provide for levying a tax for the ensuing year sufficient, with other sources of income, to pay the deficiency of the preceding year, together with the estimated expenses of the ensuing year." (Article 10, Section 2.)

Had this provision of the Constitution been observed in the past, as it should have been, the State would not now be in its present financial condition, and I deem it needless to impress upon you the mandatory terms of this provision. The Constitution requiring that you shall make provision to meet the deficiency of the past year, and such having been ignored heretofore, it is but fair to assume that the purport of the Constitution imposes upon you the duty of making a like provision for previous years.

I have laid before you as briefly as possible the very unsatisfactory condition of the State's finances. This serious status of affairs calls for prompt and efficient action. It is your paramount duty to meet this obligation and to discharge your duty by earnestly seeking to remedy a condition which has reached a point where action cannot longer be evaded or disregarded. You are the sworn representatives of the people, and upon you alone devolves the duty and responsibility of squarely meeting this unhealthy condition in the most important department of our government.

In my last message, dealing with this subject, I said:

"This is the most important function of the State, so far as its business affairs are concerned, and it is not only an unwise, but a suicidal, policy, to continue expending more money than the revenues of the State amount to. The question resolves itself into this, that expenditures must be curtailed, or more revenue raised. The former, I fear, is impracticable, and the latter can only be done in one of three ways: First, by requiring the county authorities, upon whom devolves the duty of ascertaining and placing upon the tax books all property, to exercise a rigid supervision of tax returns, and forcing them to require a proper listing of property heretofore escaping taxation. Second, by a license tax, as suggested by your committee; or, third, by increasing the tax levy, which is undesirable, as it will only place additional burdens upon the honest taxpayer, while the 'tax dodger' still escapes."

In reference to the curtailment of expenditures, I am still of the opinion that they cannot be materially reduced, for the reason that the exigencies arising from the material growth and the political conditions of our State are such as will not justify any appreciable decrease. It is therefore clearly manifest that our revenue must be increased; and, as I have said, this can be done in one of three ways. One of these propositions—a license tax—has already been adopted, but, as has been shown, this does not meet the require-

ments of the situation. The other two alternatives remain: to increase the property assessment, or to raise the tax levy.

In reference to increasing the assessment, and as to the machinery for accomplishing this, I beg to refer you to the report of the Comptroller-General. As will be seen by this report, the Comptroller-General believes that our present assessment laws are sufficient, if properly enforced, and suggests in what way they can be enforced. He calls attention to an accepted fact that property is now generally assessed below its real value, which is contrary to the requirements of the Constitution, and adds that much personal property is now entirely escaping taxation. This is a complex and difficult subject, and I commend the painstaking presentation made by the Comptroller-General, in his comprehensive report, to your careful and earnest consideration. You are aware of the fact that an assessment of all property will be made in 1906; therefore, if the assessment is to be increased, steps should be now taken looking to that end. Should nothing be accomplished at this session to increase the property assessment, it only remains for you to increase the tax levy, which should and must be done, in order that the dignity and integrity of the State shall be properly maintained.

The Income Tax Law is practically disregarded throughout the State, the only exception of importance being Richland County for the past year. The entire receipts from the tax go into the State Treasury for State purposes, and better provision should be made for the enforcement of this law alike in all counties.

Our present law, fixing a nominal penalty for nonpayment of taxes within the time required by law, should be amended, and a penalty of ten per cent. should immediately attach upon all taxes remaining unpaid on January first. I recommend that the time allowed for the payment of delinquent taxes, with penalty, be fixed at sixty days. The law as it stands at present is cumbersome and difficult to enforce, and is of no practical benefit.

The law authorizes the Governor, by and with the advice and consent of the Senate, to appoint County Auditors and Treasurers. The Governor now makes the appointment of these officers as the result of a party primary, which practically means their selection by the people. The Auditor, in my opinion, should be entirely free from the influences of politics, and I recommend that appropriate legislation be enacted prohibiting any party from placing this office in a primary.

SINKING FUNDS.

The assets of these several funds on December 31, 1904, are as follows: Cumulative Sinking Fund (for reduction and payment of South Carolina Brown $4\frac{1}{2}$ per cent. Bonds), \$527,248.59. Ordinary Sinking Fund, \$64,109.88, of which \$2,936.73 belong to escheats and \$61,173.15 to the Ordinary Sinking Fund proper. Sinking Fund for insurance of public buildings, \$16,471.62.

Statements will be found in the Report of the Commissioners of the Sinking Fund for the year 1904, showing in detail how these three funds are invested, and loaned; and how they have been increased during the past year.

REVENUE BOND SCRIP.

On December 19, 1904, the Supreme Court of the United States affirmed the decision of the United States Circuit Court, in the case of Lee against Robinson, and declared the Revenue Bond Scrip of this State to be void. Under the Act of March 2, 1872, \$1,800,000.00 of this scrip was issued, and since the year of its issue, its validity has constantly been before the courts. By this decision the State is forever relieved of the liability to redeem the \$1,800,000.00 of scrip outstanding, and a menace to her finances has been removed. Had the decision been the other way, the State would have been compelled to pay this \$1,800,000.00.

Since December, 1901, the interests of the State have been represented by Mr. William Elliott Jr., of the Columbia bar, who appeared at the request of the Attorney-General's office. Mr. Elliott has rendered valuable service to the State, which service certainly deserves compensation, and I recommend that he be paid such an amount as may appear to you just and equitable.

EDUCATIONAL INSTITUTIONS.

I am deeply gratified to report to your Honorable Body that during the past year the great cause of education has continued to advance in our State. No greater nor more all-important cause can demand our thought, our care and our best energies. In all lines, material and industrial, as a State, we have prospered, and to know that our common schools and our higher institutions of learning reflect this progress and prosperity in the highest, best and most important interests of a commonwealth, should be, as it is, a source of pride and of pleasure to us all. Time, labor and money spent for

the purpose of educating our children yields a return than which there is none greater. Ignorance is an evil which we cannot afford to permit—it is a crime against the future, and to get rid of this deplorable condition would be money well spent at almost any cost. The spirit manifested by the masses of our people all over the State is a safe guarantee of the hope that the future will continue to reveal progress and even greater success in this all-important cause.

The reports of the higher institutions of learning which are supported by the State will be submitted to you by the State Superintendent of Education. These papers will command your interest and every one will show a satisfactory condition of affairs generally in these institutions. I do not believe it is necessary for me to go into details, especially as the reports, full and complete, will be before you.

At the South Carolina College the enrolment of students is larger, I believe, than ever before in its history. The new normal scholarships have been eagerly sought, they have been awarded to most worthy and deserving applicants, and it is clear that they have been strong factors in infusing new life and activity in this institution.

At the South Carolina Military Academy an increased attendance is shown. The efficiency of the graduates from this historic institution has won signal recognition from the War Department, and this is indeed a tribute to the worth and excellence of its management. This is one of our oldest and most honored institutions of learning, with a career of valued and useful service to the State.

Clemson College continues to grow and flourish. Its capacity is taxed to the fullest extent to accommodate the cadets, and life and growth are everywhere in evidence. The agricultural scholarships, established at this College at the last session of the General Assembly, will attract many young men along the lines for which this institution was primarily established. The new Agricultural Hall, recently completed, is a valuable addition to its splendid equipment.

Winthrop College, the only institution of learning which South Carolina supports exclusively for the education of women, has a career which fully justifies the distinction it enjoys. Since its establishment it has grown year by year in the hearts of our people, and has proven a potent and influential factor in developing education in our State. From its doors annually go forth young women who have received the most careful technical training as teachers, and the effect of the work of these trained and cultivated educators is in evidence in every county in South Carolina.

The South Carolina Institution for the Education of the Deaf and Blind, at Cedar Spring, submits a report which shows that this institution is keeping pace with our other educational interests. I availed myself of the privilege of visiting the school last year, and was pleased and gratified to see evidences of the remarkable work which is accomplished. There can be no substitute for the training, the system and the helpful influences which are here so skilfully combined; there can be no just and adequate estimate of the good which is revealed in the molding of useful lives.

The trustees of these institutions, with one exception, together with those of the Colored Normal, Industrial, Agricultural and Mechanical College, at Orangeburg—which, I am glad to say, is well managed, and is doing good work—all ask from you practically the same appropriations as were given last year. I earnestly recommend that these appropriations be made, and the good work done, with the results accomplished, make me regret that we cannot do even more.

COMMON SCHOOLS.

In reference to the condition of the common schools of the State, I would respectfully refer you to the full and painstaking details which are presented in the report of our State Superintendent of Education. This report shows an increased attendance, and also shows that twenty districts at your last session secured the passage of special acts to issue bonds for the purpose of building new school-houses. In this report is included the statement that a very large number of school districts have levied special taxes. It is gratifying to note that the school terms are gradually being increased, with larger salaries paid to teachers, which, in my opinion, is most necessary and important.

Superintendent Martin recommends that a certain per cent. of the school funds be set aside for the erection of school buildings by the county boards of education, and in this recommendation I heartily concur. A recommendation looking to an increase in the number of rural school libraries, and regulating their establishment, which recommendation also has my indorsement.

In my last message I called attention to the necessity for establishing, in our larger cities and towns, schools of manual training, in which boys might be taught honorable pursuits. I also urged the need for night schools, especially in mill communities. There is much need for these schools, and I again request you to give your careful attention to this subject.

In this connection I believe it would be an excellent plan to establish at Clemson, from the funds of the College, scholarships in the textile school for the benefit of young men from the cotton mills who seek technical training in this department.

SOUTH CAROLINA COLLEGE.

I take it for granted that the members of the General Assembly are aware of the fact that for some time an organized movement has been steadily in progress looking toward a change in the organization of this institution.

In consequence of this movement, application will be made to you at this session to grant to the South Carolina College the title and charter of a State University. The Trustees, the Faculty, and the Alumni of the College believe the time has come for enlarging the sphere of usefulness of this venerable seat of learning. I heartily favor the proposed plan and think the time most propitious for this State to reestablish this College upon a University basis. The College has just celebrated its one hundredth anniversary and we have a right to believe that the advanced and progressive spirit of education now so apparent in our State is due, in a large measure, to the century of honored years which has marked the life and worth of this institution.

I shall not attempt to do more than to briefly direct your attention to some of the weighty reasons governing my recommendation in this matter. Almost every State in the Union has a State University, and this is true of every Southern State except South Carolina. We must provide such an institution sooner or later, or allow our educational system to remain incomplete. It is a fact that for the lack of such an institution a number of young men now go to other States for the instruction which should be furnished them at home. The demand for University facilities is further shown by the statement that a large number of the students of the College are now outside of the regular courses, and thus the faculty is forced by the actual demands of the students to do University work. A University organization would offer far greater facilities for expansion and growth, to keep pace with the rapid advance of education, and with the growing demands of the people. Such a change would give larger powers for service, with but small additional cost.

It is also the purpose of the Board of Trustees, in changing the organization of the College to that of a University, to increase the

facilities for instruction in the Law Department; to add a Commercial Department, and to make such other additions as may be required.

To effect the necessary changes an additional appropriation of only \$10,000 is asked for, and this is, I believe, a moderate amount when measured by the results it will accomplish. I urge this appropriation, and under the circumstances it should reasonably be hoped that the united appeal of the Alumni, the Faculty and the Trustees will receive the favorable consideration of your body.

COMPULSORY EDUCATION.

The people of this State have, for some years past, shown an increasing disposition to tax themselves for the support of their educational institutions. Especially is this true where our common schools are concerned. By this willingness is shown a growing realization of the fact that a State can do nothing better for the protection of its highest and truest interests than by educating its children. Ignorance has ever been, not only a serious incubus to any people, but a menace to its very civilization. This is truer today than it has ever been, and the question forces itself upon our consideration, whether or not we can afford to allow any number of our children to grow up in ignorance. As near as can be estimated from United States census figures and from the reports of the Superintendent of Education, there are today about 25,000 white children in South Carolina between the ages of six and twelve years who do not attend school, though schools are easily accessible to most of these children. The question then, and a vital one it is, presents itself to us; can we, for the sake not only of the State, but for the sake of the children themselves, longer allow this deplorable condition to continue?

More than thirty States have adopted compulsory education, and we should now seriously consider whether we can longer afford to postpone taking such a step. Have our common school facilities reached such a point as will warrant this action? I believe they have, provided that the proposed law be not too burdensome in its practical operation. By this I mean that children should not be compelled to attend schools so far from their homes that attendance would be a hardship, nor should the age limit for compulsory education be too drastic. This would cause the law to become unpopular and thus fail to accomplish the purpose for which it was intended.

I have given this matter much careful thought and I am convinced that a conservative beginning should be made at once. Later on, as our school conditions advance and the law grows in popularity and its necessity is more fully realized, needed improvements can be adopted.

I recommend that you adopt a compulsory education law, making it obligatory for all children between the ages of eight and twelve years to attend school for a certain number of months during each year. The distance from the schoolhouse to which this law should apply is a matter for your wise consideration. But, gentlemen, a schoolhouse should be within the reach of every child in South Carolina. The passage of such a law as I most earnestly urge upon your attention would, I feel sure, be of material benefit from every standpoint. The duty to train and educate our children, to prepare them for lives of influence and usefulness, should be as binding upon the State as it is upon parents, and is, beyond all question, an obligation we can no longer afford to evade or postpone.

DEPARTMENT OF AGRICULTURE, COMMERCE AND IMMIGRATION.

It is with a great deal of pleasure that I commend to your careful consideration the full and admirable report of the Commissioner of Agriculture, Commerce and Immigration. This report shows, beyond any question, the urgent need for such a department. Among many most interesting statistics the all-important statement that, of the 19,308,800 acres of land included within the area of our State, only 5,775,741 acres are under cultivation—this one pregnant statement should awaken your zeal and stimulate you in supporting this department, which already shows a record of work and results.

In advocating the establishment of this department in my last annual message, I did so after the most careful consideration, being prompted to do so because of the belief that our State, with its great undeveloped resources, was sorely in need of an official move in this direction.

South Carolina, by the establishment of this department, has become the pioneer Southern State in developing its agricultural and commercial resources by means of immigration from other States, and from abroad, and this fact has already won for us widespread recognition. Though this department was only established at your last session, and our efficient Commissioner qualified just nine months ago, the report of Commissioner Watson will show valuable

and far-reaching results already accomplished. It is difficult to begin a work of this nature; to officially organize a State Immigration Department is an arduous task, especially so when the State is beyond the lines along which the immigration movement has been progressing.

It was not until the first of August last that Mr. Watson was enabled to officially reach desirable foreign immigrants and to direct their thoughts toward South Carolina. Only a few months have elapsed, but since this time more than 200 are now numbered among the inhabitants of this State. This is a direct result of the good work of Commissioner Watson, as is shown by the fact that more immigrants have landed here during the past few months than for many years previous. These will be valuable additions to our citizenship, they have been carefully selected, and many made bank deposits immediately upon arrival here.

In his work the Commissioner has kept strictly within the requirements of the act in reference to nationality, and has also been mindful in this respect of the expressed wishes of the Immigration Convention, held in 1903.

A number of colonies, composed of most desirable material, have already been projected, and a number of others are now being negotiated. In this connection it certainly should be interesting to know that 79,000 acres have been officially contracted for at once, and options have actually been given and are now held upon more than twice this amount, to be disposed of by purchase. This colonization feature is a most important phase of the work, and if it did no more than to materially increase our white population, it would be, to us, of untold benefit.

The agricultural and commercial interests of the State have by no means been neglected, but the Commissioner has kept in close touch with Clemson College, and is indebted to the College for valuable assistance. In addition to the colonization and sale of lands, the outlook is most encouraging for bringing varied industries into the State, these being attracted by the advertisement, through this department, of the great natural advantages of South Carolina. I earnestly recommend that you give this department all needed encouragement and assistance. It rests entirely with your body to bring immigration from other countries into our State, for by the laws of the United States this must be done only through official State channels, all individuals and agencies being strictly prohibited from engaging in this work. As only a small appropriation was made for

this department last year, and no increase is asked, I desire to bring one matter to your attention. The Commissioner is necessarily required to do much traveling, and, in view of the fact that he is entirely removed from all legislation, I recommend that he be exempted from the provisions of the Act prohibiting State officials from using free passes from railroad and steamboat companies.

STATE MILITIA.

Your attention is invited to the reports of Adjutant-General Frost and Lieut.-Col. Ezra B. Fuller, of the United States Army, which contain valuable facts for your consideration in reference to the State Militia. Upon my request, Colonel Fuller was detailed by the War Department to report for duty, to act in cooperation with the Adjutant-General in promoting the efficiency of our State troops. The services of this officer have been most valuable, and the military branch of our Government has been materially aided by his work.

From these reports is shown the needs of the Militia, both in reference to appropriations and the necessity of a revision of the Military Code, to make its provisions conform to the requirements of the Act of Congress, approved January 21, 1903, known as the "Dick Bill." This Act, which has already done so much to advance the interests and efficiency of the troops of this and other States, requires that "the organization, armament, and discipline of the organized Militia shall be the same as that which is now, or may hereafter be, prescribed for the Regular and Volunteer Armies of the United States." The Act further provides that the Militia shall be sufficiently armed, uniformed, and equipped for active duty in the field, before they can participate in the annual appropriations made by the general Government for the support of the Militia, which annual allotment amounts to nearly \$18,000.00 for the State of South Carolina. This amount was secured this year, although the Assistant Secretary of War reports that, had the law been strictly applied, on account of deficiencies and failures, we would have been deprived of our proportion.

It is also shown by these reports, that, in proportion to population, South Carolina has a larger force of Militia than any State in the Union, and that the appropriation from the State for the support of the Militia per capita is very low. The requirements of the "Dick Law" are such that we are confronted with the necessity of either reducing the number of companies or of increasing the appropriation so as to meet its demands. This is a matter of serious import to

the State Militia, and I feel sure that in considering it you will act solely with a view to the best interests of the State and of those who have volunteered in its service. During the past year encampments were held in Columbia. These encampments are of great benefit, and steady improvements each year attest their value. In view of the storage and supplies necessitated by these annual encampments, a State Armory is, in my judgment, a necessity.

The report of the Adjutant-General is a detailed and intelligent statement of the condition and needs of the State Militia, and I am sure that his recommendations for the betterment of the service will have your careful consideration.

DISPENSARY.

Last year I purposely refrained from making any recommendations in reference to the Dispensary. My reason for this was that I had not then had sufficient time to familiarize myself with the practical workings of the system. I have since had greater opportunity to study some of the more important details regarding the management of this institution, and for this reason I beg to submit, for your consideration, changes which I am constrained to think will be improvements.

To properly regulate and control the sale of liquor has always been a question most difficult of solution. Theories upon this subject, whenever and wherever tested, always become difficult problems when their practical enforcement as laws, or regulations, are attempted. No liquor law has ever yet been devised, which, in its general operation, has given entire satisfaction. South Carolina is the first and only State that has attempted to solve this problem under such State control as is included in our present Dispensary Law. In spite of the fact that this law has many strong points which commend it, most notably among them being, in my opinion, the fact that it has decreased drunkenness, it is also true that, like other laws, it has its imperfections. I am convinced that if this system can be properly regulated, it will be one of the best solutions of the liquor question. If not properly managed and controlled, its usefulness will be at an end. The recommendations which I shall make will be submitted with a view solely to improve the system, and to place all available legal restraints around the sale and use of liquors.

The purpose of the Dispensary should be, not to increase, but to curtail and control, the sale of liquor, and this purpose should always

be kept in view. As a business institution, it should be placed as far as possible above criticism, and its restrictive regulations should be rigidly enforced. The management of the Dispensary has always been the subject of more or less criticism. During the past few months this criticism has been made frequently, and with the greatest freedom. It is necessary that the system should be made as business-like as possible, and to this important end I shall principally direct my recommendations.

COUNTY BOARDS.

I respectfully recommend that the various County Boards of Control should be appointed by the State Board of Directors. Two members of this Board to be appointed upon the recommendation of the legislative delegations, the other member upon the nomination of the Mayor of the county seat. It should be the duty of these County Boards to indorse orders filed with the State Commissioner, by county dispensers, for such supplies as may be needed for their respective dispensaries, naming brands and amounts required. This Board should elect the various county dispensers, but these dispensers should be subject to removal by the State Board of Directors, for cause.

STATE COMMISSIONER.

The State Commissioner should, in my judgment, be the officer whose duty it should be to purchase all supplies for the Dispensary. He should be required to make contracts, not for any specified amount of liquor, but for such supplies as may be actually required, such requirements to be determined by the Commissioner, based, as far as possible, upon orders received by him from dispensers, approved by the County Boards, and filed with him thirty days before the advertisement for bids by that officer.

Each contract made by the Commissioner should require the firm contracted with to guarantee the sale of such goods as may be ordered, and shipped to the State Dispensary, said guarantee to be entered as a part of the bond. All advertisements for bulk goods should be placed strictly and absolutely upon a competitive basis, by letting it be distinctly understood that the lowest responsible bidder shall be awarded the contract. It should further be the duty of the Commissioner to make, each year, quarterly reports to the State Board of Directors, showing the amounts contracted for the previous quarter, including the brands and prices, which report the State Board of Directors shall have published in at least two daily newspapers of the State.

STATE BOARD OF DIRECTORS.

The Board should be required to meet each week at their office in the State Dispensary, to remain in session as long as may be necessary for the transaction of their business. The general supervision and management of all County Dispensaries should be in their charge, and they should be specifically charged with the duty of seeing that all restrictions governing the various dispensaries should be strictly enforced. These are responsible and arduous duties, for which the members of this Board should receive a salary of not less than \$1,500.00 per annum, each, and should be required to file a bond of not less than \$10,000.00.

I further recommend that the law as to the location of County Dispensaries be amended to restrict them to such incorporated towns and cities as, in the opinion of the County Board of Control, furnish adequate police protection to the public against disturbances of the peace.

Should these recommendations be adopted I am constrained to believe that they will accomplish two purposes, namely: They will place the Dispensary upon a more business-like basis and will also provide the machinery by which the legal restrictions of the system will be properly enforced.

The reports of the State Board of Directors will be submitted for your consideration, showing the business transacted during the past fiscal year, and I respectfully refer you, for all details, to these reports.

REMOVAL OF DISPENSARIES.

At your last session there was enacted a law giving to counties which desire prohibition the right by a majority vote to close their dispensaries, and upon the taxable property of all counties so voting it was required that there be levied an annual tax of one-half of one mill, this tax to be expended by the Governor in enforcing the law, should the local authorities fail to do so. Objection has been made to this law on account of the tax imposed, it being contended that it is in the nature of a penalty, its effect being to deter the people from voting for the removal of Dispensaries.

I do not agree with this view. If prohibition be substituted for the Dispensary Law, then prohibition should be enforced, and when this cannot be done through the sentiment of the people, expense must certainly be incurred. The counties now pay for the enforcement of each and every law, and it is not fair to expect counties which maintain the Dispensary to take the profits accruing to the

General School Fund, to defray the expenses of the enforcement of the law in a county which pays nothing. Besides this, the tax is by no means excessive; it can be expended only when necessity requires, and then solely in an effort to accomplish the purpose for which the people voted. That it will not deter them from voting for what they desire, was certainly demonstrated recently in the only election which has been held under the provisions of the law. Although it is required that the tax be paid annually, it need practically be paid only once, for if the local authorities do their duty in enforcing prohibition—which they will do whenever the people demand it—the money will be refunded to the county, and the ordinary county tax can be thus reduced by one-half of one mill. This tax feature of the law, then, it appears to me, instead of being regarded as a penalty, preventing the counties from obtaining what they desire, should rather be viewed as a guarantee that they shall have, as far as possible, just what they do desire.

ENFORCEMENT OF THE DISPENSARY LAW.

The enforcement of this law includes difficulties which should be apparent to all, but which really are not fully understood. It certainly presents a serious problem to your Chief Executive, a problem of ceaseless and never-ending responsibilities and anxieties. It is unnecessary to attempt an enumeration of the various obstacles which are always encountered, and which, owing to their peculiar nature, are not found in the carrying out of other laws.

Where popular sentiment favors the Dispensary Law, there is, of course, very little work for the constabulary to do, but in other localities exactly the reverse of this is true. I feel sure, however, that the efforts which have been made have gradually brought about generally improved conditions, but I do not hesitate to add that much yet remains to be done. In some localities, as is well known, juries refuse to convict, thus necessarily placing the entire burden of enforcement upon the constabulary. This complicates and increases the difficulties which are already sufficient in themselves, and in such localities it seems impossible to have the law strictly enforced.

Without seeking any explanation of these reasons, prejudices and objections, the fact remains that they do exist, and, furthermore, they present the most serious obstacles toward legitimately carrying out the spirit of the law. In considering this problem I believe that the time has come when we should be perfectly frank in dealing with it. Nothing can be lost by this, and such a course will in the

end lead to a better understanding. In the first place, I wish to be fully understood. It is the duty of the Governor to enforce the laws as they appear upon the statute books, making them apply alike to every section. This I have endeavored to do, and this I shall continue to do, so long as the responsibilities of your Chief Executive devolve upon me.

With no desire to evade this responsibility, I deem it my duty to mention one aspect of the Dispensary situation as experience has revealed it to me. Since I have been in office I have done my utmost to strictly enforce this law in Charleston, with the result that I have been able to improve conditions only by the suppression of flagrant and open violations. Mayor Rhett has given me official aid, but our combined efforts have not apparently accomplished more than is above indicated.

There are few in Charleston who favor the Dispensary, which, although it has been in operation for more than a decade, is strongly opposed, and has made but few converts. There are those in Charleston who favor its enforcement because it is the law, and in my efforts to enforce it I have been accorded by them a strong moral support, for which I am deeply grateful. The location of the city, with its extensive water front; the inability of the constables to make seizures before shipments are delivered to the consignee; the large number of places where liquor is illegally sold; these and many others, make a combination of difficulties which it seems impossible to overcome. Trials by juries have proven ineffectual, and the resources of the law have been appealed to, time and again, but the illegal sale of liquor continues. In giving you information concerning the condition of the State, as I am required to do, I have thought it best to state these facts to you plainly. It is my conviction that this is also a part of my duty, and, though for many reasons I would prefer not to do so, the situation has been brought to your attention.

The Chief Constable calls my attention to the fact that he is much hindered in the general enforcement of this law by the existence of so-called "social clubs," etc. These clubs pretend to operate under charters granted by the Secretary of State, but in reality they are only places for the promiscuous illegal sale of liquor. In granting charters, the Secretary of State acts in a ministerial capacity, and must, therefore, grant a charter for any expressed purpose. I recommend that the laws governing the granting of such charters be amended, so that they shall not be granted until sixty days' pub-

lished notice has been given, and that the Secretary of State be given authority to refuse such charter upon an affidavit by the Chief State Constable that he has reason to believe that the applicants intend to violate the Dispensary Law. Should the officers or employees of any such club or organization be convicted of violating this law, I would further recommend that the Secretary of State be required to revoke any such charter heretofore granted.

LAWLESSNESS.

At the last session of your body I sent a special message upon the subjects of lynchings and lawlessness. This I conceived to be my duty at the time, and I regret to add that subsequent developments have not changed my opinion. So important should be the consideration given to this subject, that I must again bring the matter to your attention. Before making any further statement, I shall here quote from the special message referred to, and renew my former recommendation.

"The Governor is popularly credited with power to prevent and punish these outrages against the State. In reality he is practically powerless. When notified, he may sometimes frustrate the mob by the employment of troops, but when the crime has been committed, his hands are really tied. In the meantime, the spirit of lawlessness is unchecked. A band of lawless men may feel secure in taking the life of a fellow being on almost any pretext. This deplorable condition should be remedied. To compel greater respect—the proper respect—for the majesty of the law, I recommend the enactment of special legislation in reference to lynchings, in order that the great responsibility of officials directly charged with the enforcement of the law may be brought home to them, and that more effectual measures be taken for the apprehension of persons who take the law into their own hands."

I am convinced that this matter should receive more consideration than was given to it at your last session. There is nothing so important to any State as to have its laws properly respected, nothing which strikes deeper at the roots of its civilization than to have these laws disregarded. It is absolutely necessary that all crimes, of whatever nature, should be punished through the legal channels—through this source, and through this source alone. The power and majesty of the law should be brought to bear, as far as possible, upon lynching for any and for all crimes. There is no alternative.

Lynching for one crime leads to lynching for other crimes, and thus lawlessness is substituted for law. Surely experience leads to this inevitable conclusion.

Since your last meeting I have had, on several occasions, to order out troops for the protection of prisoners. While I have been almost forced to do this, owing to the nature and urgency of the requests, I consider this by no means desirable. The services of the militia should never be called upon until the civil authorities shall have exhausted every means in their power to uphold the law. I am firmly convinced that, were this stand taken, calls upon the Governor for the services of the militia to protect prisoners would cease entirely.

As I said in my special message—which is here quoted—the Governor is practically powerless where the details of the enforcement of law are concerned, for the reason that he has no power to compel an officer to do his duty. This applies not only in the case of lynchings, but to other offenses also. When a lynching occurs, when an officer charged with the sacred duty of protecting the life of a prisoner while in his custody; when a sheriff allows the mob to usurp the law and barbarously take the life of a human being—then there is no question in my mind but that a penalty should be provided for such dereliction of duty. I am of the opinion that this should be remedied by such legislation as would inflict a penalty for neglect of such duty, the penalty to include removal from office of the offender when such extreme measures are rendered necessary for the proper vindication of the law.

I readily recognize the fact that occasions sometimes arise when the use of troops is necessary, but I am equally sure that the growing tendency to ask for such assistance should be stopped. Offenders should be made to understand the fact that no expense will be spared to bring them to punishment. I asked last year for a special fund to suppress lynching, and though none was provided, I felt it my duty, nevertheless, to make an attempt, in each and every lynching that has occurred, to uphold the dignity of the State in endeavoring to bring the offenders to justice. In order to effect this, I have had to exceed my contingent fund, as I will explain later in a special message. I feel sure that money so expended was well used and will do much to uphold law and order in South Carolina. A special contingent fund to be used for this purpose, by the Governor, is, in my opinion, a necessity, and I recommend, therefore, that you appropriate such an amount as you may deem proper, to be so used.

I have noticed, with much gratification, the awakening of a healthy public sentiment against lynchings and lawlessness throughout the State and a growing determination that this evil shall cease. Our people are realizing the fact that the reputation of a State as fully determines its influence and power, at home and abroad, as the character of a citizen determines his standing among his fellow men. We can hope for much from the aroused conscience of public opinion, manifestations of which are reflected in the pulpit and by the press, and echoes of which are heard throughout the State. Especially true and gratifying is this as is evidenced by the organization of Law and Order Leagues, with members numbered among our representative citizenship. From this source we have a right to expect much, and we will all unite in the hope that their crusade for law and order will have far-reaching beneficial and uplifting results.

TWO ADDITIONAL JUDICIAL CIRCUITS.

Among the measures which I urged at your last session was the recommendation that you should abolish the Act providing for special courts, and that two additional Judicial Circuits should be established. I am impressed, more than ever, with the necessity for the adoption of this recommendation. The special courts have for the past two years entailed an expenditure of twice the amount of the appropriation, and the tendency seems to be to hold these courts more frequently each year. For many reasons this plan has not proved satisfactory, and I believe the demand is general for a repeal of the law.

It seems that the necessary work cannot be accomplished with the present number of circuits, which have not been increased in keeping with the growth of the State and the natural increase in litigation. Realizing the difficulties involved in redistricting the State so as to secure two additional circuits, I have tried to devise other means of meeting the situation, but can find none which do not seem to conflict with the Constitution. I therefore again recommend that the number of judicial circuits be increased from eight, as at present, to ten, and that this be done at the present session of your body.

FORMATION OF NEW COUNTIES.

I desire to call your attention to a manifest conflict between the Constitution of 1895, Article VII, providing for the formation of new counties, and the Act of the General Assembly of 1896, page 64, Section 1, incorporated as Section 574 of the Code of Laws of 1902.

This Act provides that the sections of an old county or counties, desiring to be incorporated into a new county, shall simply file with the Governor a petition, signed by one-third of the qualified electors, setting forth the boundaries, the proposed name, number of inhabitants, area and taxable property of the proposed new county. The Constitution, however, provides that, not only shall such a petition be filed, but that a showing of compliance should be made with the requirement of the Article referred to. In passing upon such matters, I have endeavored to follow the Constitution, and have required that a showing be made in accordance with its provisions, but I would recommend that, at this session, you amend the statute law in order that it may conform with the obvious intent and phraseology of the Constitution.

THE STATE HOSPITAL FOR THE INSANE.

The care of the defective and dependent is one of the most perplexing problems of modern civilized life. Many States support these classes in distinct institutions, but in our State they are kept in one only, and it appears that such is to be our policy for years to come. For this reason, with a growing population, we must expect a large number of admissions to the State Hospital for the Insane, which, since its opening in 1828, has received lunatics, idiots and epileptics and—by subsequent legislation—inebriates. In making comparisons of the cost of the care of this institution with those of other States it is well to remember the conglomerate character of our State Hospital. In going through the wards of the Hospital one cannot but be struck by the large number of old people who cannot be strictly considered insane, but who are really suffering from the infirmities of age. The feeling of sadness which one must experience in contemplating the fact is relieved by the reflection that the State thus offers her protection to the aged and helpless to whom fate has denied the blessings of home and loved ones.

Nearly 550 new patients have been admitted during the past year, while the daily average number of patients in the Asylum has been 1,210, and the total number under care during the year is 1,710.

The erection of the Taylor building two years ago gave more room for white men; in two wards, where nearly seventy white women are maintained, are still kept in the same building the negro women, and the single rooms for this class, many of them, are occupied by two patients. The conditions have been such that the Board of

Regents has felt the imperative necessity of striving to complete at once the Talley building, for the exclusive use of white women.

An appropriation of \$15,000 was made last year for this purpose, it being then understood that the total cost of the building would be about \$30,000.00. This structure is now nearly completed and will afford much needed relief to the class which appeals first to our sympathies. A deficit of between \$13,000 and \$14,000 still exists, owing to the necessities of the situation.

You will be asked by the Board of Regents to appropriate the sum of \$14,000, which amount, in regular routine, would have come before you this year for the completion of the building, and in this request I heartily concur. The amounts asked by the Board for support, insurance and other incidental expenses appear as reasonable to me as they could possibly be in the circumstances, and I recommend that the amounts be appropriated as requested. I cannot close this brief summary without sincerely commending the excellent care and management which is given to this institution by the Superintendent and his coworkers. Here are united tender sympathy, thoughtful consideration and practical business ability, thus making this Asylum, in the strength of its highest needs; fill well the humane purposes for which it is maintained.

PENITENTIARY.

In reference to the condition of the Penitentiary, I would refer you to the reports of the Superintendent and the Board of Directors. During the past two years I have availed myself of opportunities to observe this institution closely, and am glad to say that it is excellently managed. The convicts are well treated, and the discipline is equal to that of any similar institution. The health of the inmates, with the exception of some cases of tuberculosis—many of which were contracted before the convicts were committed—has been excellent during the past year. A new building has been nearly completed, as quarters for the officers and guards, and I understand that it is the intention of the Board during the present year to make another valuable addition, a building in which convicts suffering from tuberculosis may be separated from the others. It is the purpose to have this building constructed upon modern hygienic and sanitary principles, and I am gratified to note that from year to year such improvements are being added as tend to make this a model institution of its kind.

Abundant crops have been made upon the State farms, and from these crops the State has realized a handsome profit. The farms are valuable for more reasons than one; for, besides being a paying investment, convicts who cannot be employed either upon the public roads or in the Penitentiary can be here utilized. I would especially commend the work which is being done at the Reformatory for young convicts. This is one of the best features of our penal institution, and should be maintained as a valuable adjunct to our prison system.

In this connection, I have noticed with much gratification a movement by the South Carolina Federation of Women's Clubs for the establishment of an Industrial School and Reformatory for such white boys as may need the care of such an institution. If these unfortunate ones, drifting into vagrancy and degradation, could be helped and strengthened by the training and care of such a school, untold good would be accomplished. Not only would they be kept from association with hardened criminals, but sheltered and feeling that they were cared for, with uplifting and helpful influences, many drifting ones could be trained for lives of service and usefulness. There is needed work to do, and even a small beginning now would bring fruitful results in years to come.

STATE BOARD OF HEALTH.

Experience has clearly shown me that the manifold duties and great responsibilities devolving upon this Board are neither understood, nor are they properly appreciated, by the public generally. Constant calls are made upon the Board, which, were they responded to in the manner desired, would require the expenditure of a very much larger sum than is now appropriated. Under such circumstances, no matter how faithfully the members endeavor to perform their duty, they cannot satisfactorily accomplish all they are asked to do. The principal difficulty confronting them is that they are so often expected, not only to prevent the spread of contagious diseases, but are asked to care for and cure those suffering from such diseases, which procedure would entail an enormous expense. With the appropriation they have had at their disposal, to prevent the spread of contagious diseases is all they can be expected to accomplish. How this can best be done is a question to be considered. The report of the Board contains statements of grave importance, and also has a number of recommendations. A careful reading of this report will show that the proper care of the public health is a matter of

much greater importance than is generally thought. I believe that more efficient service could be rendered were the Board empowered to elect a physician, as an executive secretary, giving this officer such salary as would enable him to devote his entire time to matters concerning the public health. If no larger appropriation can be secured, rather than have this prevent the election of such an officer, I believe it would be wise to have set apart from the present appropriation such an amount as would be necessary for this purpose.

The Board recommends that the quarantine stations in the State be transferred to the United States Public Health and Marine Hospital Service, and, for many reasons, in this recommendation I concur.

STATE BOARD OF MEDICAL EXAMINERS.

This Board desires certain changes in the law governing the practice of medicine in the State, which changes appear to me to be most desirable. Our present law requires the Board to meet in April, but the request is made that this date be changed to June, for the reason that all of the colleges will then have finished their commencements. It is also desired that the license fee, which is now very small, be increased to a reasonable amount. This will warrant an increased appropriation, amounting to \$500.00, which amount is needed to defray the expenses of this Board.

I join in these requests and recommend that the changes be made.

THE STATE GEOLOGIST.

The establishment of this department a few years ago was an important move, where such a step was certainly necessary. The full and complete report made by State Geologist Sloan merits your careful attention. Here are clearly shown the vast and valuable mineral resources of our State, very many of which are practically undeveloped. Some of these deposits have no equal of their kind in the United States, and are attracting attention in many directions where profitable results must follow.

Phosphate rock, in the form of phosphatized marl, torn from the bed of the ocean by the waves, and stranded along the beach, has been discovered in Horry County. This contains fifty-seven per cent. of calcic potash, and the boulders are large, with promise of large quantities on adjacent territory.

In gold mining the activity and increase is marked, and a study of the Gaffney tin deposits, "which constitutes the most valuable

tin area yet discovered in the United States," reveals again the growing and fruitful development of a splendid field.

The State Geologist is zealous in his work, and is actively and systematically canvassing the entire State in his labors. It is expected that his good work will be further enhanced by the early cooperation of the United States Geological Survey in the work of stream measurements.

RAILROAD COMMISSION.

The annual report from this important department of our State government will be found on your desks, and I commend it to your consideration. The report contains much valuable information concerning which it is not necessary for me to refer to specifically, but which is well worthy of your careful attention. In it will appear the gross earnings and the net income of the railroads, and the taxes paid by these corporations. Similar statements are made concerning the operations of the express, telegraph and telephone companies doing business within our State for the fiscal year ending June 30, 1904. The magnitude of these interests, from all of their varied stand-points, is self-evident, and any recommendations contained in this report should be carefully examined and acted upon.

GOOD ROADS.

Last year, in my message, I felt it necessary to dwell at some length upon the subject of our public highways, and I recommended such legislation as would give the counties the right, by majority vote, either to issue bonds, or to levy an annual tax for road improvement. No action was taken upon this important matter and I now renew my former recommendation.

This is a subject of the utmost importance to all the people—a subject in which is included much more than the improvement of our roads. The benefits to be derived, from any point of view, are numerous, and strong business considerations make it imperative that this valuable work should be properly attended to.

PENSIONS.

The largest appropriation made by your body is for the care of the Confederate Veterans. This amount seems large when compared with the total appropriation, but when viewed in another light we cannot but feel that we would like to do much more for the old soldiers who in years that have gone did so much for their State

and their country. The total number of pensioners on the rolls this year was 8,554, and \$197,309.42 was the amount distributed among them. The law, generally speaking, is working satisfactorily, but in reference to certain classifications it is believed that improvement can be made, and the Comptroller-General will specifically direct your attention to the proposed changes. Anything pertaining to the proper care of the veterans of the Confederacy will, I am sure, have your most thoughtful consideration. We owe them a deep and lasting debt of gratitude, and to care for those who, in their old age and declining days, need this care, should be, as it is, a privilege and one of the first duties of our people.

BIENNIAL SESSIONS.

At your preceding session an amendment to the Constitution providing for biennial sessions of your body, having been agreed upon, it was submitted to the qualified electors of the State at the general election, a majority of whom voted in favor of this amendment. Believing as I do, that biennial sessions will afford all necessary legislation, and will result in a retrenchment of expenses, I trust you will ratify this vote in order that the amendment may become effective. Should this be done, you should, at this session, take such action as may be necessary to adjust and conform other parts of our Constitution and statutory law to the change wrought by the enactment providing for biennial sessions.

In this connection I shall submit a recommendation which I deem most important. For many reasons it would be wiser and better to have all of your State officers elected for a term of four years, not allowing them to succeed themselves. The reasons for such a change are obvious, and do not need to be here discussed. The expense and necessary neglect of duty incident to conducting a campaign every two years is alone almost sufficient reason for the proposed change; and the people should also be spared the loss of time and the inconveniences of too frequent campaigns. I am firmly convinced of the fact that the best interests of the State would be subserved by making this change in our Constitution, and I recommend it to your favorable action.

PHOSPHATES.

I regret to report to you that the mining of phosphate rock in our rivers has, for the present at least, practically ceased. Only two

companies are now at work and operations are conducted to a limited degree. In the vicinity of Beaufort no work whatever is being done.

During the past year several applications were made for a reduction of the royalty, which is now 25 cents per ton. The Board of Phosphate Commissioners, after considering the matter, declined to grant this request for the reason that the royalty is now so small that no further reduction would be likely to encourage mining. An additional reason for this was the fact that the royalty has been pledged to the holders of the bonds of the State, and the Board felt that without their consent they would not be justified in making the reduction requested. A total royalty of only \$10,784.00 was received for the last fiscal year.

PROTECTION OF FISH AND OYSTER INTERESTS.

These interests are of more importance to our State than seems to be realized, and at present they are practically neglected. It should be the policy of the State to develop these resources by affording that protection which is absolutely necessary to prevent them from being destroyed. With proper care these interests could be made a valuable source of revenue to the State. The difficulty in legislating upon this subject has always been a lack of such information as was necessary to make efficient and, at the same time, practical laws. Until such information can be furnished, and such laws suggested, nothing, in my opinion, will be done. I recommend, therefore, that a commission be appointed, whose duty it shall be to make a thorough examination of this subject, to report at your next session.

SILK CULTURE.

The United States, with an annual product amounting to about \$125,000,000.00, is the largest silk manufacturing country in the world. It has been practically demonstrated that our climate is admirably adapted to silk culture, and if this were undertaken properly it would result in bringing a most desirable class of foreign silk growers here. All necessary materials for silk culture can be obtained free, and the Government will buy, at highest market rates, all cocoons raised in the United States. In 1902 the cocoon crop of Italy sold for \$35,615,400.00, and this value of cocoons is more than quadrupled when manufactured. A silk crop can be raised, gathered, and marketed in five weeks, and in South Carolina this would be finished by the first or second week in April.

As a profitable and desired addition to our diversified crops, I think this an important subject for our careful consideration.

THE DOME OF THE STATE HOUSE.

During the past year the Commission for the Completion of the State House reported to me that, in the discharge of their duty, they had cause to fear that the dome of the State House was in an unsafe condition. The Commission requested me to take immediate steps to have the dome examined. By agreement, it was decided that I should apply to the Secretary of the Treasury to secure the services of a competent engineer for this purpose. I did so, and the Secretary promptly aided me by sending Mr. Kort Berle, Chief Structural Engineer in the office of the Supervising Architect of the Treasury Department.

Mr. Berle made a careful examination, and reported that the dome was safe, which report I transmitted to the Commission.

PROTECTION OF STATE RECORDS.

The Secretary of State asked last year for an appropriation, to be used in suitably equipping his office with fireproof record cases. The offices of the State Treasurer and of the Comptroller-General also stand much in need of similar improvement. Valuable documents of State are kept in these offices, and money properly invested in permanent improvements would be well spent.

I trust that you will give this matter your attention, and I recommend that you appropriate the amounts necessary.

CONCLUSION.

In as brief space as possible I have endeavored to give to you information concerning the most important departments of our State Government, and have made for your consideration such recommendations as appear to me to be necessary and important. I rejoice to add that progress and prosperity continue to bless us, with the uplifting influences that come from the earnest labors of a united people. The welfare of South Carolina is largely in your keeping, and much hope for her future will depend upon the results of your deliberations. There was once a temple erected with no sounds of the tools of labor, with no confusion of haste and disorder, without noise and strife. Imbued with this spirit, with united zeal

and devotion may you quit yourselves like men ; may your deliberations add to the upbuilding of our Commonwealth ; may they contribute to the reign of law and order, to the peace and happiness of our people, and to the dignity and honor of our State.

PETITION.

State of South Carolina, }
Aiken County. } North Augusta School District, No. 66.

To the Honorable Members of the House of Representatives of the State of South Carolina.

Gentlemen: The undersigned citizens and voters of the North Augusta School District, No. 66, aforesaid County and State, respectfully set forth the following statements of facts:

First. That North Augusta is a most promising village, beautifully situated, and growing rapidly; that there live in this village and near vicinity over two hundred white children of the age to attend school, and that this district is entirely without a school building at this place.

Second. That, recognizing the necessity of providing proper school facilities to meet this demand, the citizens of this district, at a duly qualified election, passed a law levying a four-mills special tax—which special tax approximates the sum of \$2,400.00—not including the general three mills and poll tax.

Third. That a building such as would meet the requirements of this place could not be paid for in cash out of this levy, but that payment therefor would of necessity be extended over a number of years.

Fourth. That the citizens, at a mass-meeting held in said district on the twenty-eighth day of December, A. D. 1904, decided to respectfully petition your honorable body, and ask that, at your

earliest convenience, you pass an Act granting this district the right to issue bonds bearing interest, and that the same be secured by taking three mills of the special levy now in force, and placing the same to the payment of the bonds and interest as they become due, and as is provided for in a Bill now before your honorable body.

MEMORIAL.

Mr. STOLL presented the following:

A PENSION LAW:

A MEMORIAL TO THE GENERAL ASSEMBLY.

Whereas, Camp Pressley, United Confederate Veterans, at a meeting held on the second Monday in September, 1904, having under consideration the Pension Law, and desiring to have the said Law so amended that the pay of all widows of Confederate soldiers and sailors may be made equal, adopted the following resolutions:

That a committee of five members of the Camp be appointed to memorialize the General Assembly, through the Williamsburg delegation, in regard to the changes desired in the Pension Law.

The committee met on December 5, 1904, in pursuance of the above resolution, and prepared the following Memorial to be presented to the General Assembly by the County delegation, to wit:

Whereas, We believe that great injustice has been done by the Pension Law to those widows of Confederate soldiers and sailors

who have died since the war, inasmuch as they receive the small allowance of \$16 per year, while those widows of soldiers and sailors whose husbands died from sickness and disease during the war receive \$48 annually;

And, whereas, We find that those soldiers and sailors who died during the war were neither braver nor more patriotic than those who have died since the war;

Therefore, we do most respectfully petition the General Assembly (1) That at its next session, to be held some time in January, 1905, in its wisdom it may see fit to amend the said provision of the Pension Law so as to carry into effect the changes suggested and requested in the above resolution;

And, whereas, We witness with regret the growing decrepitude of those old soldiers and sailors in Class C 2, many of whom are physically unable to perform any laborious work, we do also respectfully petition the General Assembly (2) to amend the said Pension Law so that the pay of the soldiers belonging to Class C 2 may be increased.

In order to attain the ends sought for in this Memorial, it is the request of the Committee that Representative Stoll present it to the General Assembly and use his best efforts, along with other Members of the County delegation, to have the necessary changes made in the Pension Law, and we do hereby appeal to every patriotic Member of the Assembly to aid in furthering the laudable ends of this petition.

Respectfully submitted.

H. H. KINDER,
W. L. WALLACE,
A. W. FLAGLER,
G. J. GRAHAM,
F. M. BRITTON, Sr.,
Committee.
PHILIP STOLL.

REPORT OF COMMITTEE TO EXAMINE CONDITION OF
STATE COLLEGES.

The Committee to Examine into the Financial and Physical Condition of State Colleges submitted the following report:

Columbia, S. C., January 24, 1905.

To the General Assembly of the State of South Carolina:

In compliance with an Act of the General Assembly entitled "An Act to examine into the expenditures of the appropriations for State educational institutions, and the conditions of the same, and report to the General Assembly," at the last session of the General Assembly the Speaker of the House of Representatives appointed as members of the Committee, provided under said Act, on the part of the House, Arthur Kibler of Newberry, and Robert Lide of Orangeburg; and the President of the Senate appointed, on the part of the Senate, P. L. Hardin of Chester. The Committee met in Columbia on the 5th day of December, 1904, in order to take up the work provided by the terms of the said Act. Senator P. L. Hardin was selected as Chairman of the Committee.

The Committee then proceeded to visit all of the State educational institutions, in the order in which they appear in the following report. Each member of the Committee gave careful and personal attention to the work required, and utilized such time in visiting the State Colleges as was necessary, in the opinion of the Committee, for a thorough and complete performance of the duties of the Committee.

SOUTH CAROLINA COLLEGE.

We first visited the South Carolina College, and President Benjamin Sloan received us with the utmost courtesy. Accompanied by him, we walked over the grounds, through the buildings, visited a number of classrooms, and he gave us every opportunity to fully learn the conditions of this institution.

This property is very valuable, and beautifully located. The buildings are old, and, while the equipment is not so new or modern as at some of the younger institutions, still there are ample arrangements for the comfort and convenience of the young men and instructors. There is an air of staid old age about the College, and even from an outside view one is truly impressed with the fact that

this College has a long and glorious history of usefulness to its credit.

The grounds are fairly well kept, but there is occasion for almost constant attention in order to keep up the general repairs. We visited some of the dormitory rooms. While the furnishings and arrangement is plain, still it is convenient and ample for the purposes.

INSTRUCTION.

The Faculty of this institution is a strong one, and the students are ably and carefully taught. The Normal Department is well attended, and the Normal scholarships that were recently established are proving popular and attractive. There are seventy-eight Normal students in attendance, from all of the Counties of the State. From the appropriation each student is paid \$5.00 per month for eight months towards his general expenses, and, in addition, his tuition is remitted to him. There remains a small balance on hand from the appropriation for the aid of the Normal students, occasioned by some of the beneficiary students dropping out from time to time from various causes.

STEWARD'S HALL.

This Hall is nicely fitted up, and is an attractive place. It seems to be a source of much care and anxiety to the management of the College. Owing to the increased cost of provisions, it became necessary to advance the board, some time back, from \$10.00 per month to \$11.00 per month. This College does not have the advantage of a college farm to help out in the matter of feeding the students. It is optional with the students whether or not they will board at the Steward's Hall. At the date of our visit 103 students boarded at this place. On September 28th last there were 143 boarding at the Steward's Hall, and on November 15th, 137. Some dropped out on account of the advance in the cost of board. The lady in charge seems capable. We think it would be well for some means to be adopted, if possible, to induce a larger proportion of the students of the College to take their meals at the Steward's Hall. The building is there for the benefit of the students, and it would appear that a lower rate of board could be secured by a larger number of students taking their meals at the Steward's Hall.

EQUIPMENT.

The report of this Committee last year recommended that a safe be secured for preserving the books and records. This has been

done, and we think that it was a good investment. The arrangement for heating the Library could possibly be improved for the safety of the building.

BUILDINGS AND GROUNDS.

It is probable that it would prove both economical in the end, and very advantageous, for the building now used for the Infirmary to be utilized for other purposes, and a new infirmary to be erected in some other portion of the grounds.

There is ample space on the lands of the College for many improvements, if there were only sufficient funds available for this purpose. It seems almost a pity that several of the valuable vacant lots belonging to the College could not be utilized for some practical purpose. We simply call this matter to the attention of the General Assembly in order that they may consider whether any action to this end is desirable.

INSURANCE.

The insurance on the College property is written by the Columbia agents in regularly licensed Companies, and it is carefully looked after.

STUDENTS.

There were 269 students enrolled at the College on the date of our visit. Of this number eighty-one paid tuition, some of the others being Normal students, and the others securing remission of the tuition charges under the rules of the institution.

The student-body was divided as follows: Normal, 78; Law, 27; Special, 29; Freshman, 53; Sophomore, 30; Junior, 27, and Senior, 25.

The income of the College during the period of our examination came from the following sources: State appropriation, \$30,350.85; tuition, \$2,662.01; term fees, \$2,600.50; diploma fees, \$92.00; room and light fees, \$1,214.21; electric light fees, \$276.04; Infirmary board, \$252.60; miscellaneous, \$874.27; balance on hand December 1, 1903, \$645.80.

Among the expenditures, which amounted to \$38,297.78, are the following classifications: Salaries, \$29,254.64; wages, \$1,367.75; general expenses, \$1,283.42; repairs, \$1,504.79; Infirmary, \$891.53;

WINTHROP NORMAL AND INDUSTRIAL COLLEGE.

We found Professor James P. Kinard in charge of the institution in the absence of President D. B. Johnson, who had been in the North for several months for treatment for his health. Since our

visit to Winthrop College in December, we have been advised by President Johnson that he has returned to his work at the College very much improved in health. This news was received by us with much gratification. Professor Kinard received the members of the Committee most cordially, and extended us every courtesy. We found him a capable assistant to President Johnson, and the College has not suffered while in his charge. Winthrop College is well and thoroughly managed in a businesslike and practical manner. All details receive necessary attention.

BUSINESS DEPARTMENT.

Mr. R. B. Cunningham, who has charge of the business office of the College, gave us every facility for making an examination of the accounts and books of the College. His system of bookkeeping and securing and filing all vouchers for expenditures is exceedingly practical and convenient. We think that more uniformity in the methods of making out these vouchers and preserving them would be advantageous to the business departments of the various Colleges. While all of the books and vouchers were found by us to be correct and carefully kept at each of the Colleges, we think that a uniform adoption of the form of vouchers used at Winthrop would be desirable. Mr. Cunningham will furnish copies of his forms upon request, and a general uniform system would prove convenient. The system at Clemson is very similar to that at Winthrop; while several of the Colleges are required to file their vouchers with the Comptroller-General in Columbia. This matter should receive attention in order to secure uniformity.

Balance on hand December 1, 1904. . .	<hr/> \$9,099 01

The balance on hand on December 1, 1904, of \$9,099.01, together with such funds as may be derived from other sources, will be used towards the necessary College expenses until the appropriation of 1905 is available. The above statement of receipts includes every income of the College—State appropriation, amounts paid by students for board, tuition, fees, etc. To determine the total cost per student, the amount of expenditures for the year may be divided by 477, the number of students enrolled on the date of our visit to the College. The charge of \$10.00 per month for board to each student is very reasonable, especially when it is taken into consideration that it includes meals, lodging, laundry, lights, fuel, etc.

It may be of interest to state that of the receipts \$5,449.75 came from the music scholars, and \$222.00 from the elocution and art students. For ordinary tuition only \$2,820.00 was collected during the year.

The students are charged especially for the courses in Music, Elocution, and Art, which accounts for the large income from tuition for those courses. It will appear that there are only about seventy students who pay regular tuition; the others are either beneficiaries or are exempted under the rules. A few students are taking special courses, and they only pay tuition for such.

The teachers who board in the dormitories are charged the same therefor as are the students.

COLLEGE FARM.

Mr. H. B. Buist, the Superintendent of the College Farm, accompanied us on our visit to the Farm, and gave us the opportunity for a thorough inspection. He furnished us with the following inventory of the Farm assets:

6 mules, at \$200.. . . .	\$1,200 00
55 milch cows, at \$45.. . . .	2,475 00
100 hogs, at \$10.. . . .	1,000 00

1,600 bushels corn, at 75c.. . . .	1,200 00
Farm equipment, wagons, plows, and other implements.	1,000 00

Total.. . . . \$10,025 00

The Farm consists of 144 acres of land, and was purchased about twelve years ago at a cost of \$20.00 per acre. Considerable improvements in buildings, etc., have been made since, at a cost of from \$4,000.00 to \$5,000.00. Its present value is estimated at \$12,000.00.

An account of all farm expenses is kept, as is credit given the Farm for all products furnished the College, and the accounts are kept just as if the supplies from the Farm were purchased from outside.

The following statement of the Farm account was furnished us by the Superintendent:

The Farm is undoubtedly a great convenience to the College. It would prove a very difficult matter for the management to secure a constant supply of fresh milk and butter, meats, fruits, vegetables,

etc., were it not for the Farm. The products furnished the College from the Farm are the very best, and the values named in the foregoing account are exceedingly reasonable for the quality furnished. We dined at the College during our visit, and found the butter and articles of that class as good as could be obtained anywhere.

LABOR.

There seems to be some difficulty in obtaining steady labor on the College Farm, and we believe that it would be economy in the end for the General Assembly to allow twelve convicts, or more, to the College to work on the Farm, and in the improvement and keeping up of the College grounds. It would assure a steady supply of labor, and would prove, no doubt, a great saving to the institution. From time to time there is a great deal of work to be done on the campus, and this could be done largely by the convicts, if they are given to the College.

BUILDINGS AND GROUNDS.

The buildings are well kept, and everything has the appearance of receiving watchful attention from a vigilant management. We visited the halls, classrooms, dormitories, infirmary, dining-room, kitchen, storage-rooms, laundry, heating plant, and found all neat and well kept.

The appropriation of \$3,000.00, made by the General Assembly last year for painting the buildings, has been well spent. The work had not been entirely completed at the time of our visit, but it had progressed far enough to enable us to appreciate the improvement. The work has been well done, and the contract was let at exceedingly reasonable figures for the complete job. The buildings are well equipped with water supply and hose, on each floor, for use in case of fire, and there is a rope fire escape on hand at every window in the dormitories that does not open on an outside veranda. From each porch there is a ladder escape for use in case of fire. During the night there is a watchman in constant attendance. Hence it appears that ample precautions have been taken for the safety of the girls in case of fire.

We would like very much to see several modern cottages erected on a portion of the campus for the use of some of the members of the faculty and their families. They now rent houses in the city of Rock Hill; while it would be more convenient, both to them and

for the College, if they could be located nearer the institution. There is ample room on the campus for a few dwellings of the character desired.

INSURANCE.

There has been no change in the insurance since last year. The present policies are in regularly licensed companies, and were taken out in 1902 for three years. The policies will expire in August, 1905, and we recommend that the necessary appropriation be made for the renewal of this insurance; and the policies should be increased, for the present insurance is much under the actual value of the property at risk.

RELIGIOUS CARE.

On Sunday mornings the students may attend services at any of the churches in Rock Hill, and they are accompanied by certain of the teachers. Every Sunday evening religious services are held in the College Chapel for the benefit of the students, and attendance at these evening services is compulsory. They are conducted by the ministers in charge of the various churches in Rock Hill, and they take turn about in conducting them, in accordance with an arrangement made early in the session. This is an excellent plan.

There is a Y. W. C. A. organization at the College, which is in charge of the students, and excellent work is done along spiritual lines.

INSTRUCTION AND TRAINING.

Winthrop is an institution that the people of South Carolina may well view with pardonable pride. It is accomplishing a great work. The young ladies are well cared for, and everything pertaining to their necessary comfort and training is well looked after. The health of the students is given close attention. The instructors are polished and genteel, and an air of brightness and cheerfulness pervades the entire institution. Everything seems to move along with the regularity of clockwork, and every one appeared to have something to do to keep up with the general harmony of things.

We were much interested in many of the courses of instruction, and the modern methods in use. While the arts and music, as well as a complete literary course, are taught by the best of instructors, the most practical affairs of life are given closest attention. Cooking, dressmaking, sewing, millinery work, typewriting, and stenography are thoroughly taught. The manual training department, which is being developed after the methods that have become popular in

many of the Northern institutions, attracted our attention especially. This department is apparently popular with the girls. Light wood-work is done, and the girls are taught the use of the simpler tools. Basketry, weaving, and textile work is taught them, while wood carving is taught, and a number of useful articles can be made by a little effort on the part of the young ladies with simple, light tools at the neat work-benches.

Should we attempt to describe further many things that were of interest to us at Winthrop this report would be protracted far too long, for there is much to see and learn from a visit to that beehive of industry, where the girls of South Carolina are being so well trained by the aid of the State.

CLEMSON AGRICULTURAL AND MECHANICAL COLLEGE.

Your Committee visited Clemson College, and were met and very kindly treated by the President, Dr. P. H. Mell, the professors in the different departments, and the officers who are connected with the institution. We may say that there was no apparent effort on the part of anyone to withhold from the Committee anything that would be of use in making a close examination, in fact there was an urgent demand on the part of both officers and teachers that there should be a thorough examination of every department in all of its details. We were glad to see this feeling existing among those in authority, because it shows that they do not feel that they have any right to keep from the General Assembly any information that it should have. In the short time that we were at Clemson it was impossible that we should minutely inspect every department of the institution, but we gave our time to such subjects as we thought would be of most importance to the General Assembly.

FINANCES.

The finances of an institution should properly be considered as the most important part for the General Assembly to consider, for a board of trustees can run an institution when it has plenty of money to do it with; and, in this respect, the Board of Trustees of Clemson College is fairly well taken care of. When we speak of the finances, we wish here to commend most heartily the splendid work of the Treasurer and his bookkeeper. We examined the vouchers where nearly \$200,000.00 had been spent for all purposes, and

there was not an error of so much as one cent. This, we think, is a pretty good record. Every item is in its proper place, and it was not difficult to find anything that was needed. If there is an expenditure here of a good deal of money, and no doubt there is, still every cent of it can be accounted for.

The principal source of income at Clemson College is from what is known as the "Tag Tax," paid by the different fertilizer companies doing business in the State. The tax, as is well known, is twenty-five cents on every ton of fertilizers sold in the State, which tax is for *inspection* purposes. There are other sources also; such as the Morrill Fund, amounting to \$12,500, given by the United States Government; the Land Scrip, also given by the United States Government; interest on the Clemson Bequest, and smaller amounts from other sources which appear below.

Clemson College, therefore, was in *debt* on the day of our visit. This deficit was caused by the building of the Agricultural Hall, at a cost of about \$52,000, and by the payment made to beneficiary cadets in compliance with an Act of the last General Assembly.

THE FARM.

The Farm is under the immediate direction of Mr. J. P. Lewis, and he is a most efficient man for the place. It would be difficult to find one better than he, as he has made all out of it that might be expected. Proceeds for the year, as given us by Mr. Lewis, follow:

Total	\$7,829 60

In addition to the receipts already enumerated, the Hatch Fund, amounting to \$15,000.00, is given by the United States Government for agricultural purposes. More than one-half of this amount is used in paying teachers.

We can now get at something like the total cost of a student at Clemson College, disbursements from all funds considered. There were in attendance on the day of our visit 610 students, which will be a fair average for the session of nine months.

Disbursements from Cadet Fund.	\$44,876 86
General Fund, \$163,868.03 (less \$42,140.51 on account Agricultural Hall, and \$900.32 Waterworks).	120,828 20
From the Farm and Dairy Herd.	7,829 60
From Hatch Fund to pay teachers in agriculture, about	7,500 00

\$181,034 66

Divide this amount by 610, number of students in attendance, and we have the approximate cost of a student at Clemson College, \$313.17 per year.

WHAT IT COSTS A STUDENT.

Board and laundry, \$7.50 per month, 9 months.	\$67 50
Hospital, per year.	5 00
Incidental Fee.	5 00
Breakage (which is returned if nothing is broken).	3 00

Uniform.	\$22 50
Tuition (if he is able to pay it).	40 00
Books, about.	10 00

\$153 00

This is a very moderate cost, and no college of similar standing can show a less cost to the student. Let us remember, however, that Clemson College has a very large income from other sources, and were it not for this the cost to a student would be fully as much as at other colleges. Certainly it would be nothing less when we consider the very large expenditures of the institution as pointed out in this report.

As to whether there are too many drawing salaries at Clemson, and as to the amount of the salaries, we must let the General Assembly determine. We give the facts as we find them. It does seem to us, however, that there should be a limit, and, in our opinion, that limit has been reached.

PERMANENT IMPROVEMENTS.

There was expended during the year for permanent improvements as follows:

Completion of Agricultural Hall	\$43,040 83
Improvement in Waterworks	900 32
	<hr/>
	\$43,941 15

One new cottage for a professor is now building, and will cost about \$800.00.

During the year one barn, worth about \$1,000.00, was destroyed by fire, and fifteen cows were burned, but the losses were nearly covered by insurance.

We are pleased to know that the insurance of property is carefully attended to, and losses by fire, which will probably occur in the future, as they have in the past, will not be a very serious money loss to the institution.

INSTRUCTION.

The boy who goes to Clemson College will find that he is in charge of men well fitted for the different positions which they fill. If he wants to take a course in Mechanics, Chemistry, Electricity, and kindred subjects, or, we might say, the natural sciences, he will

find Clemson the very place for him. In fact, we very much doubt if he can find a better place in the South.

We are glad to say also that Agriculture is likely to be given more attention in the classroom in the future. This result will be accomplished to some extent by an Act of the last session of the General Assembly, providing for 124 beneficiary scholarships, and the preference to be given to those boys who wish to take the Agricultural Course.

In the matter of instruction, we feel that there is yet something wanting at the College. Either French, German, or Latin should be taught, and perhaps all three if possible. This matter should receive the attention of the Board of Trustees without further delay.

CARE OF BUILDINGS AND GROUNDS.

Everything is well cared for at the College. Nothing is done in a careless or indifferent manner. The visitor will be struck with the neat appearance of everything in the buildings and on the grounds. This is due largely to the energy and zeal of the President.

DISCIPLINE.

To govern 600 boys requires the very best thought and care. To do this requires military discipline, and we find this at Clemson. Capt. C. D. Clay, of Kentucky, a grandson of the immortal Henry Clay, has charge of the Military Department of the College, and no better man could be found for this work. He has served for a number of years in the United States Army, and knows what obedience means. As a result of the thorough work here, the boys are easily controlled.

While the military feature should be very prominent, work in this line is severely hampered for the want of a suitable drillground. This defect should be remedied at once.

BARRACKS.

In the Barracks there are accommodations for about 600 boys. These buildings, three stories high, are neat and comfortable. Everything is kept in the best order. We feel, however, that there is one want to be supplied here, and this should have been attended to long ago. On the second and third floors fire-escapes should be provided in case an accident in the way of a fire should occur. It

would not cost much to get them, and they should be supplied at once. No one may be burned to death by fire here, but to be on the safe side fire-escapes should be put into the Barracks.

GENERAL CARE OF STUDENTS.

The proper care is given to the students. Should they be sick, there is a hospital here, and a good physician on hand. The religious and moral training of the students is also well attended to. A minister of some denomination preaches in the College every Sunday morning, which is very thoughtful on the part of the management.

As to board at the College, this is as good as could be expected. Your Committee were invited to dine with the boys, and found the meals well prepared and in abundance. The best of order is maintained in the dining-hall.

THE FARM.

Unfortunately for South Carolina, Clemson College has been located in a section where it is impossible to demonstrate to a student or a visitor what can be done with a farm. There is very little land owned by the College that is at all fitted for farming purposes. It is true that there are about 100 acres of good bottom lands belonging to the College, but these lands have been very expensive, as it has required more money than they are worth to build embankments to prevent overflows, and the end is not yet. Future overflows will necessitate the expenditure of more money, and after a while, perhaps, the bottom lands will be abandoned as too costly. Besides these bottom lands there is none other fitted for agricultural purposes. It is true that there are more than 1,000 acres of land owned by the College, but they are practically useless for farming, except a few acres at the Experimental Station. We feel that the location of Clemson was a failure so far as agricultural purposes are concerned, but it is too late now to remedy the matter.

The Farm is worked and the grounds kept up by about thirty-five convicts furnished by the State.

GENERAL REMARKS.

Clemson College has been built. Thousands, yes, hundreds of thousands, of the people's money have been lavished upon it, and it does seem that the end of the expenditure in buildings and improvements is not yet. The buildings are furnished, and furnished

handsomely. Everything that is needed has been supplied, but it does seem that there is a desire for indefinite expansion. Suppose that this extension increases from year to year, as it has in the past few years, where will the end be? Some one may say that there is a demand for more room, and that applicants for admission are turned off every year for want of room. Let us remember that it is not possible to educate every boy in South Carolina at Clemson College, and there must be a stop somewhere. Suppose that by some means, and it is not impossible, its primary source of income, the "Tag Tax," should be cut off. What would happen then? Either a very large appropriation must come from the State Treasury, or part of the work of the College would have to be discontinued.

A halt should be called, and the sooner the better. It is wiser and better to check oneself than to have another do it.

COLORED NORMAL, INDUSTRIAL, AGRICULTURAL, AND MECHANICAL COLLEGE, ORANGEBURG, S. C.

When your Committee visited the Colored College, they found Dr. Thomas E. Miller, the President, ready, willing, and anxious to give them all the information they asked for, and he suggested inspection of some things that perhaps would not have otherwise been thought of. He is certainly a man who commands the obedience and respect of all the pupils.

BUILDINGS.

It is a great pity that the buildings at the Colored College are frame, and not brick, as they should be. The two main buildings are new, and well constructed, but as there are dormitories in them, there is always more or less danger from fire. A sharp watch is kept all the time, and there is no hour of the night when there is not a watchman on duty, but even with this precaution, which is absolutely necessary, the danger from loss of life by fire is not altogether averted.

The buildings are very plainly furnished; in fact, the furniture in the dormitories is of the very simplest kind, and not what it should be. These people have done the very best they could with the means at hand, but they simply have not had the money to make better appearances as to furniture and school equipments.

The new industrial building, made of brick, is not finished. The students at the College did most of the work, and it has been well done, but they have been forced to stop, as they have no money to buy the material necessary to finish it. It will take about \$2,500.00 to complete the building, and we do earnestly hope that the General Assembly may appropriate this necessary amount, as we think it would be an act of justice, and to withhold the appropriation means postponing the completion of the building.

All the buildings, except the two main halls and industrial building, are very poor, one-story frame houses. They may answer their purposes fairly well, but it is to be hoped that the day is not far distant when better buildings may be secured.

The largest income is from the United States Government, and is known as the "Morrill Fund," which is used to pay teachers. It now amounts to \$12,500.00, which is its limit. The Land Scrip Fund also comes from the United States Government. These funds and the appropriation made by the State support the College.

The item in expenditures, \$615.00, is accounted for by resolution of the Board of Trustees, which provides that any student who has attended school for five months in the year shall receive one month's board free. There were enough who attended five months in the year to claim their one month's board, amounting in all to \$615.00. The fund came from the sale of farm products, and did not come from the regular appropriation for the College.

THE FARM.

We find that there is a good farm at the College, and it is carefully attended to. There are some cows on the Farm, but not near enough to supply milk and butter for the needs of the College.

COST TO A STUDENT.

The students at the College pay no tuition fees. In fact, the great majority of them could not pay \$40.00 tuition, and were this required of them they could not go to College.

Total expense outside of clothing is about as follows :

Board for 8 months at \$5.50.. . . .	\$44 00
Incidental fee.. . . .	1 00
Books, about.. . . .	8 00
<hr/>	
Total.. . . .	\$53 00

We were in the dining-hall at the dinner hour, and saw what fare the pupils had. It was good enough, and plenty of it. The students had no complaint whatever to make, and we saw no room for any. This is very commendable on the part of the officers. We were also struck with the perfect order in the dining-room. There was no confusion whatever, and complete happiness seemed to possess every one.

The students are well cared for, in sickness and in health. In case one is sick, a splendid physician, living in the town, is sent for, and his services are paid for by the College according to a yearly contract.

INSTRUCTION.

The methods of teaching are fully up to what one might expect. Of course you would not find here as many different subjects taught as in our other colleges, but such as are taught are taught well. It is really surprising to see how eager the colored children are to learn. They are anxious to get all they can, and are making rapid progress. Their teachers seem to take an interest in them, and they are all obedient.

As for order on the grounds and in the classrooms, it is the very best. No fault whatever can be found.

During the year 823 pupils have been enrolled, and of these 350 board at the College. About 1,200 were turned off because there was no room.

INSURANCE.

We find the property very well insured, and in the best of companies. Were the property insured for three or five years at a time there would be a saving of nearly one-third of the premium, and since the premium is nearly \$1,000.00 per year, it would be well to look into the matter.

MAINTENANCE.

The Board of Trustees ask for \$5,554.35 to help in running the College this year. They need this amount, and as they ask very lit-

tle of the State, there is no reason why it should not be granted. We hope that the General Assembly may make the appropriation without hesitation.

There is no safe in the College for keeping valuable records, and we would ask that an appropriation of \$200.00, if so much be necessary, be made for the purpose of buying a fireproof safe.

SOUTH CAROLINA MILITARY ACADEMY.

Your Committee visited the Citadel Academy, the West Point of the South, and were met by Col. Asbury Coward, the Superintendent, who seemed glad to have us come to inspect the institution. In fact, this is the case at all of the Colleges—they want the General Assembly to know their exact condition, and seem to wish to conceal nothing.

We do not find much room for expansion at the Citadel—that is, so far as land is concerned. The institution is hemmed in on all sides pretty closely, and it does seem as if there should be more room, but as it is located in the business part of a city, expansion, so far as building is concerned, is well-nigh impossible.

We found such buildings as they have in very good condition, and properly cared for. The General Assembly appropriated at its last session \$10,000.00 for putting in a heating and light plant. The old heating stoves are now done away with, and the new heating system is in use, which is a great improvement, and makes the classrooms and sleeping apartments neater and more comfortable. The \$10,000.00 appropriation for heating and lighting has been spent, and the Quartermaster had a full statement showing where every dollar had gone. The power for lighting the building is procured from the City of Charleston, at a cost of about \$1,000.00 per year, which is very reasonable.

The only source of income to the Citadel is from the State appropriation, and the amounts received from pay cadets. In addition to this, however, the City of Charleston supports six cadets, at a cost of \$250.00 each, or \$1,500.00. These cadetships are won by Charleston boys at competitive examination, held under the direction of the city authorities. These scholarships are a credit to the city, and show what a deep interest the citizens have in this institution.

COST OF EACH STUDENT.

The total expenditures for all purposes were \$42,502.02 for the year ending December 1, 1904. There were in attendance 149 cadets, sixty-eight beneficiaries and eighty-one pay. Now, if we divide \$42,502.02 by 149, we have as the cost per cadet, \$285.24. We must remember that this amount includes every expense of whatsoever kind, and is very low, considering that the Citadel is in the heart of our largest city, and everything must be bought. It includes board, clothing, medical attention, books—in fact, everything. No institution in the State can make a better showing in this respect.

PAY OF TEACHERS AND OFFICERS.

Lieutenant J. W. Cantey.. . . .	1,000 00
Lieutenant W. W. White, Quartermaster..	900 00
Dr. F. L. Parker, Surgeon.. . . .	400 00

This salary list shows only ten teachers and officers drawing pay, and the amounts paid them is low enough, when we consider the work they are doing for the boys of the State.

STUDENT-BODY.

We find here a body of healthy, vigorous, and intelligent boys from all portions of the State. There are also eight young Cubans here, and they seem well pleased with the work they have to do. It seems, then, that our Citadel is known even beyond the limits of our own Southland, even in faraway Cuba; and these young boys, going back to their native isle, will spread the news that an excellent institution is to be found in the Southern part of our great country—a school where the doctrine is taught that all men are created free and equal.

INSTRUCTION AND DISCIPLINE.

The instruction given at the Citadel is the very best. Well-equipped teachers are in every classroom, and the students must prepare their lesson, or there is trouble for them.

As to discipline, we need not say that it is first-class, as every one knows that this School is military all the way through. We had no complaint brought to us.

BOARD.

We were in the dining-room when the boys came in to dinner. We saw what was set before them, and if all their meals are as well prepared as this one, and if there is always the abundance, and of equal quality, on hand, then there should be no murmuring.

The Quartermaster informed us that board costs about \$7.00 per month. This is very reasonable, and must be the result of most careful and prudent management in this department.

MAINTENANCE.

The Board of Visitors asks for an appropriation of \$26,250.00, as follows:

Support of the Academy.. . . .	\$25,000 00
Repairs.. . . .	1,000 00
Additions to Library.. . . .	250 00

Total.. . . .	\$26,250 00
---------------	-------------

We think this amount should be given.

REMARKS.

The Citadel Academy is a great institution. It has done a great deal for the State, and is destined to do much more. It has not been extravagant in its demands. It has asked for what it needed, and no more. It has always been modest, and never "loud or stubborn," and so long as it is to be continued let it be supported in such a manner as it justly merits.

CONCLUSION.

The attendance at all of the State colleges is large, and the work is as complete and thorough as we believe is done at any similar institutions in the country. South Carolina is unquestionably doing a good part by her educational institutions, and we believe that the

results are, as a whole, quite satisfactory and encouraging. The general interest in education seems to be growing in the State, and to contemplate the large number of bright and attractive young men and young women from all portions of the State, who are now being trained for lives of usefulness to themselves and their State, one can but feel that our future is secure.

While all of the colleges cannot be given all that could be advantageously utilized by them, still we think that under present conditions the State is doing as much for her institutions for higher education as could reasonably be expected at this time.

There is now no question of the fact that it is the duty of the State to see that all of her boys and girls are given some education, still we do not think the rule will apply so far as to require the State to give all of her boys and girls the advantages of a higher education. At this time our State has placed the very best advantages and opportunities for higher education within the reach of its citizens, although the number of actual beneficiaries thereunder may necessarily be limited.

It may be a fact that when the present system of State colleges was planned, more thorough and complete results could have been obtained, at less expense to the State, had the energies not been scattered among so many institutions where separate organizations and accommodations have to be maintained; still it would be a backward step for any of the present institutions that have contributed so much for the past history of the State, and are now accomplishing so much for the coming generation of active citizens, to be discontinued. We are not yet prepared to say that the time has come, if it ever comes, for a change in the State's present fixed policy towards higher education. The future attitude of the State towards her colleges and educational institutions is a question for the deepest thought and consideration of our most patriotic statesmen. We do think that at most of the institutions expansion has now gone far enough, and that the wisest course would be to keep them up to the present high standards at this time, rather than to branch out with new projections. This alone will require no small expense on the part of the State, and much care and watchfulness on the part of the governing bodies of each institution.

Respectfully submitted,

P. L. HARDIN,
On the part of the Senate.

SPECIAL ORDER FOR 12 O'CLOCK WEDNESDAY,
JANUARY 25TH.

INAUGURATION OF GOVERNOR AND LIEUTENANT-GOVERNOR.

At 12 m. the Senate appeared in the Hall of the House of Representatives.

The Joint Assembly was called to order by the PRESIDENT PRO TEM., the Hon. RICHARD I. MANNING, who announced that the Joint Assembly had convened to inaugurate the Governor-elect and the Lieutenant-Governor-elect, in pursuance of a Concurrent Resolution adopted by both Houses.

The Sergeant-at-Arms of the House announced, "His Excellency, the Governor-elect and his escort," the inaugural procession entering the Hall of the House as follows:

Governor-elect D. C. Heyward, with Representative Altamont Moses,

Lieutenant-Governor-elect John T. Sloan with Representative B. A. Morgan.

Attorney-General-elect U. X. Gunter, Jr., with State Treasurer-elect R. H. Jennings.

Comptroller-General-elect A. W. Jones with Adjutant-General-elect John D. Frost.

The Solicitors, Presidents of State Colleges, and other distinguished citizens.

The Joint Assembly received the Governor-elect and his escort standing.

The Governor-elect and the Lieutenant-Governor-elect and the Chief Justice were seated upon the stage, at the desk of the Speaker. The other guests accompanying them were seated at the right and left of the desk.

Prayer was offered by the Rev. Dr. Charles Martin Niles, of Columbia, who fervently invoked the Divine blessing on the distinguished citizens called to administer the government.

The PRESIDENT PRO TEM. then announced that the Hon. D. Clinch Heyward, Governor-elect, was present and ready to qualify.

Thereupon the Governor-elect advanced to the desk on the right of the Speaker, and the Chief Justice advanced to the desk on the left of the Speaker. The oath of office was then administered by the Chief Justice, Y. J. Pope, to the Governor-elect, who delivered the following address:

Gentlemen of the General Assembly, and My Fellow Citizens:

Two years ago I had the honor of taking the oath of office as Governor of South Carolina. Standing again today in this distinguished presence, to pledge myself anew to the service of our State, I am even more solemnly impressed with the duties which must and do devolve upon one whom the people have selected as their Chief Executive. This occasion, with the formal renewal of my oath, though it brings before me afresh the realization of grave responsibilities, fills my heart with deepest gratitude because of the honors which have been bestowed upon me by my fellow citizens.

The past and the future alike instinctively rise before me, the one with its work finished, its history written, the other with its unknown tasks, with its welfare in our keeping. In the retrospect I see much for which I am deeply grateful, much that I can never forget. Especially true is this when I remember the loyal support accorded me by the people of our State in my endeavor to merit their confidence by advancing, as best I could, the highest interests of our Commonwealth. To feel that those to whom one is alone responsible should set upon him the seal of their approval by such a reelection as was mine is indeed a reward than which there is none greater to strive for. If I have rendered any service to my State, if I have served my people, in some measure as I hoped to serve them—if indeed I have kept the faith—this has only been possible because you,

my countrymen, gave me your encouragement and your help. Unto you, then, the credit is due, and to you this day I acknowledge my debt of gratitude.

The future is fraught with even greater import. Its duties must be met, its problems must be faced, its difficulties must be overcome. In these are included for us, gentlemen of the General Assembly, individual responsibilities which should neither be evaded nor disregarded. You are sent here by the sovereign people, and you are sent for service. It rests with you alone to measure up to your great responsibilities, and I believe that you will not fail to do so. The highest duties of citizenship devolve upon you, for to you is intrusted the sacred duty of framing and enacting laws which shall govern an enlightened people. The future welfare and the continued prosperity of our State will be assured if your deliberations are characterized by the "spirit of wisdom and understanding, the spirit of counsel and right, the spirit of knowledge and of the fear of the Lord."

In the oath which I have just taken I have obligated myself to uphold and enforce the laws of our State. This I shall endeavor to do with full regard for the rights of all of our citizens; with jealous care for the fair name and the unsullied reputation of South Carolina; with faithful effort to maintain the dignity and honor of our Commonwealth; with hope and confidence in all because of our glorious past. In the discharge of my duties as Governor I shall expect—and I feel that I shall receive—the continued cooperation and assistance, not only of the members of your body, but also of the law-abiding people of our State.

In my Annual Message, recently sent to your honorable body, I called attention, in as brief detail as possible, to the condition of our various State departments, and made therein such recommendations as I deemed wise and expedient. You are now fairly launched upon your labors, and I shall make no further mention of these matters, trusting that what I have already said concerning them has had your careful attention. I am deeply interested in all that shall merit and receive your consideration, and I will deem it both a privilege and a pleasure to assist you in any way that lies in my power.

You are making laws for a growing and a prosperous State. The unrivaled natural advantages of South Carolina, its great undeveloped resources, its wonderful industrial development—all of these are attracting to us, more than ever before, the attention of the outside world. In addition to these attractions and advantages, with

us labor and capital are not in conflict, but together are working in harmony for the upbuilding of our State. This is a blessing which is denied to many States, and we should neglect no means to promote its continuance. From every standpoint, with increasing growth and influence, the future of our State is brighter than ever before in its history.

To properly meet these growing demands, so rich with promise, merits our united action and our utmost endeavor. Difficulties must be overcome to achieve the ends desired, but this should nerve us to stronger and more determined effort. Unnecessary legislation is unwise legislation, and unwise legislation hinders and retards the advancement and progress of a people. Fewer laws upon our statute books and their better enforcement will undoubtedly bring improved conditions generally, and this would then be accomplished with less friction. A law should not only be necessary, but it should be capable of enforcement, because, if disregarded, this leads to the disregard of all laws, thus striking directly at the very foundations of government.

It is your province to direct the expenditure of the funds collected from the people, and this should always be done with wise regard for proper economy. In your official capacity you should always exercise the same judgment and foresight that you do in your private business, counting the cost but never losing sight of the objects to be attained. Economy in public, as in private affairs, means doing what is necessary, what the exact needs of the State require. A growing and progressive State necessarily means increasing expense in the conduct of its government, and if the expenditures are wisely made we can, with confidence, look for greater results.

I have briefly given you some of the thoughts that stir me on this occasion, deeming it unnecessary to add to what I have already presented for your consideration in my Annual Message. We are here, commissioned by the people to work for the best interests of South Carolina. We can have no higher privilege, and should strive to prove ourselves worthy of their trust by measuring up to our responsibilities. I have made reference more than once to the honor and the duties which are ours, but the full measure of success can never crown our efforts unless we have, in all that we do, the cooperation of the people.

I have tried to express to you some of my feelings upon assuming, for the second time, the office of Chief Magistrate of South Carolina. In maintaining the honor, the integrity and the dignity

of their State South Carolinians have ever done their full duty, and it is this which has done so much to make the glorious history of our State. Our people have never been found wanting in the past, and they can be safely trusted for the future. Let us, then, all strive to do our part, to prove ourselves worthy of our heritage, which is indeed a goodly one.

“* * * * Be just and fear not;

Let all the ends thou aim'st at be thy country's, thy God's, and truth's.”

May this animate and inspire us in all that we do, and thus faithfully striving, may we together consecrate ourselves anew to the service of our native State, to our own, our beloved South Carolina.

At the conclusion of Governor Heyward's inaugural address the PRESIDENT PRO TEM. of the Senate announced that the Hon. John T. Sloan, Lieutenant-Governor-elect, was present and ready to qualify.

Whereupon the Chief Justice administered the oath of office to him.

The Hon. JOHN T. SLOAN, Lieutenant-Governor and ex-officio President of the Senate, then declared that, the object for which the Joint Assembly had convened having been accomplished, the Joint Assembly was dissolved, and the Senate returned in a body to its chamber.

CONCURRENT RESOLUTION REJECTED.

REPORT OF COMMITTEE ON ASYLUMS AND PENITENTIARY.

Mr. RAWLINSON, by request, presented the following:
To the General Assembly of the State of South Carolina:

We, the undersigned members of a Joint Committee, appointed by a Concurrent Resolution of the two Houses of the General Assembly, at the regular session for the year 1904, to examine the accounts and the vouchers relating to all moneys received into and paid out by the Deaf, Dumb, and Blind Asylum, the State Hospital for the Insane, and the State Penitentiary, and to examine the books of said institutions, beg leave to submit the following report:

We have visited the said institutions, and have made careful examination of the books, accounts, and vouchers relating to all moneys received and paid out by said institutions, and with the exception

of a few minor clerical errors in the books and vouchers at the State Hospital for the Insane, and the State Penitentiary, found them all neatly kept, and correct.

While we do not deem it a part of our duty under the law to make any investigation as to the management of these institutions, we were able, without additional expense to the State, to make some investigation as to the management of the institutions also. We were much gratified with the exceptional zeal shown by the managements of the several institutions for the comfort, the wellbeing, and best interests of the unfortunate inmates of these several institutions, and heartily commend to your honorable body the efficient and painstaking services of those in charge of these institutions.

We append hereto as a part of this report the statements marked "I," "II," and "III," showing the receipts and disbursements of the several institutions. We have classified the disbursements so as to show, in a measure, how the funds were applied, believing that a statement of this kind will prove more interesting and instructive than a statement showing the disbursements by the month.

All of which is most respectfully submitted.

E. L. HERNDON,

On the part of the Senate.

MESSAGE FROM THE GOVERNOR.

State of South Carolina,
Executive Chamber,
Columbia, S. C., February 1, 1905.

MESSAGE No. 3.

To the Honorable the Speaker and Gentlemen of the General Assembly:

At the last meeting of your honorable body a Committee, consisting of Gen. C. I. Walker, Adjutant-General Frost and myself, was appointed for the purpose of making necessary alterations and repairs to our Confederate Monument at Chickamauga; and the sum of \$2,500.00 was appropriated for this purpose.

As Chairman of this Committee, I have the honor to inform you that this work has been substantially and satisfactorily completed, at a total cost of \$1,992.22, which expenditure leaves a balance of \$607.78 to the credit of the amount appropriated.

For your fuller information I take pleasure in handing to you the inclosed letter from General Walker, inspector, to whom we are indebted for valuable services, and with this is sent also a photograph of the Monument as it now stands.

I have the honor to be respectfully yours,

D. C. HEYWARD,
Governor.

REPORT OF THE INSPECTION OF THE ALTERATIONS
TO SOUTH CAROLINA MONUMENT AT
CHICKAMAUGA—BY C. IRVINE
WALKER, COMMISSIONER.

Charleston, S. C., December 19, 1904.

By direction of the Chickamauga Commission, I visited the Battlefield of Chickamauga, as soon as advised that the work done by the Winnsboro Granite Company in altering the South Carolina Monument had been completed. It gives me pleasure, after a most careful inspection, to report that the shaft erected by that company (in the place of the Bronze Palmetto, which, not standing the wear and tear of three years, the State was compelled to remove), is, so far as I, assisted by Capt. E. E. Betts, Engineer of the Park, could see, a perfect piece of workmanship, and had been erected without any damage to the Monument. I would, therefore, recommend that the bills for the same be paid.

It is with the greatest satisfaction that I congratulate the people of South Carolina on having the most imposing monument upon that historic battlefield. There may be others costing more money, but the position of our Monument is by far the most prominent on the field. Placed on the foothills of "Snodgrass Hill," on which place the gallant men of Kershaw's heroic brigade swept victoriously, it can be seen for miles across the open country of the "Dyer" fields. The dark color of the Palmetto did not bring it out from the background of foliage, and only the base—twenty-three feet high—was prominent, but now the shaft of gray granite, rising above the base twenty-five feet (total height, forty-eight feet) brings into bold relief this splendid Monument, which South Carolina has erected to perpetuate and show her appreciation of the magnificent heroism of her faithful sons on that immortal field.

I take pleasure in referring to the uniform courtesy and most valuable assistance rendered me by Capt. E. E. Betts, Engineer of the Park. His technical and practical knowledge was of inestimable value. His kindness, his untiring efforts, his courteous treatment have marked all the help he has so willingly and cheerfully given the South Carolina Commission.

Respectfully submitted.

C. IRVINE WALKER,
Commissioner.

To Gov. D. C. Heyward,
Chairman South Carolina Chickamauga Commission,
Columbia, S. C.

Received as information, and ordered printed in the Journal.

Mr. FRASER moved to strike out the enacting words, and demanded the yeas and nays, which were taken, resulting as follows:

COMMUNICATION.

Mr. McMASTER presented the following:

Columbia, S. C., February 2, 1905.

*Hon. Porter A. McMaster, House of Representatives,
Columbia, S. C.*

Dear Sir: Understanding from you that there is some uneasiness in the House of Representatives on the subject of smallpox in the City of Columbia, we, as the Executive Committee of the Board of Health of the City, beg to say that, in our judgment, there is no cause for alarm, that we have the smallpox situation well in hand, that there are not more than eight or ten cases within the city

limits, that all of these cases are being carefully looked after, and that in a population of some thirty thousand we do not think the number of existing cases is at all serious. The disease is not spreading, and we expect to have it stamped out in the city at an early date.

We would have no trouble whatever with smallpox in the City of Columbia were it not for the fact that occasionally cases are brought into the city from other points in the State, and, of course, this makes some trouble which we have to handle, but do handle successfully. Please reassure the honorable body, of which you are a member, on this subject, and say to them for us that there is no more danger from smallpox in the City of Columbia than in any other part of the State, and probably not as much.

We are informed that a bill has been introduced in the Legislature making vaccination compulsory in this State. We wish to say that we favor this measure, and believe that we will continue to have trouble with smallpox in South Carolina until such a law is enacted by our General Assembly. We ask that you and the other members of your Delegation impress this view upon the Members of the Legislature. Yours respectfully,

J. S. MULLER,
E. C. MCGREGOR,
Committee.

Received as information.

PRAYING FOR THE ESTABLISHMENT OF AN INDUSTRIAL SCHOOL AND REFORMATORY FOR WHITE BOYS.

*To the Honorable, the Senate and House of Representatives of the
State of South Carolina:*

Feeling a deep interest in the establishment of an industrial school and reformatory for the white boys of South Carolina, and having learned of the success which has attended the operation of such institutions in other States, we, the undersigned women of South Carolina, respectfully petition your honorable bodies to pass an Act providing for the establishment and maintenance of such a school in this State.

Thirty-one of our sister States already have institutions of this kind, and their experience clearly shows that from a financial standpoint it is cheaper to reform the wayward boy than to punish the adult criminal; while from the humane and moral point of view we feel that the Commonwealth owes to its people the duty of providing the means whereby orphans and juvenile offenders may be taught trades and fitted for useful citizenship.

And your petitioners will ever pray, etc.

PETITION.

Mr. TOOLE presented the following Petition, which was received as information:

To the Honorable Members of the House of Representatives of the State of South Carolina:

Gentlemen: We, the undersigned citizens, voters and taxpayers of South Carolina, respectfully petition, ask and pray that your honorable body pass the Ten-hour Bill now before you fixing the hours of labor in cotton and woolen mills in this State at ten hours per day. We will say here that it is utterly impossible for us who are vitally interested in this matter to come and stand around your honorable body and lobby in the interest of this bill. Indeed, we do not think that it is at all proper for anyone to do so. And, further, we believe that it is the duty of every Representative to first look out for the welfare of those who are not able to help themselves and are handicapped in the race of life.

The laboring people demand this legislation of you, though they may be afraid to say much about it. Therefore, when you vote on this question for God's sake think of the thousands of women and

little children of South Carolina who come and go from their work in the nighttime.

We further believe that human rights should be placed ahead of the dollar.

We will ever pray, etc.:

By Mr. RAWLINSON :

PRAYING FOR THE ESTABLISHMENT OF AN INDUSTRIAL SCHOOL AND
REFORMATORY FOR WHITE BOYS. •

*To the Honorable, the Senate and House of Representatives of the
State of South Carolina :*

Feeling a deep interest in the establishment of an industrial school and reformatory for the white boys of South Carolina, and having learned of the success which has attended the operation of such institutions in other States, we, the undersigned, women of South Carolina, respectfully petition your honorable bodies to pass an Act

providing for the establishment and maintenance of such a school in this State.

Thirty-one of our sister States already have institutions of this kind, and their experience clearly shows that from a financial standpoint it is cheaper to reform the wayward boy than to punish the adult criminal; while from the humane and moral point of view we feel that the Commonwealth owes to its people the duty of providing the means whereby orphans and juvenile offenders may be taught trades and fitted for useful citizenship.

And your petitioners will ever pray, etc.

"The General Assembly has appropriated \$200,000.00 in aid of the project, and the sum of \$1,200,000.00 has been subscribed to the capital stock of the company, by public-spirited and patriotic citizens in Tidewater, Virginia.

"A Bill is now pending in the Congress of the United States which authorizes an appropriation in aid of the said celebration, and there is reasonable ground to believe that it will become a law at the present session.

"Under these circumstances, it has been deemed to be desirable to call upon every State in the Union to manifest a friendly interest in this patriotic enterprise by authorizing the erection of a building upon the exposition grounds for the special accommodation of its own citizens when they attend as visitors to participate in the great celebration."

As the time is limited, I shall be glad for your prompt action, and shall take pleasure in making your wishes known to General Lee at once.

I have the honor to be very respectfully yours,

D. C. HEYWARD,

Governor.

We beg to call attention to the fact that the office of the Comptroller-General is sorely in need of cases, etc., for the preservation of the valuable records in that office. Papers of great value are compelled to be left uncovered and unprotected for lack of safe and convenient places to file them, and should a fire occur in that

office, as did occur in the Secretary of State's office, the loss would be irreparable, and nothing would be saved except such records and books as can be, and are, kept in the already crowded safe. We earnestly urge supplying this office with proper fixtures, and that sufficient appropriation be made for this purpose at this session.

SECRETARY OF STATE'S OFFICE.

This office has not been included in the examinations heretofore, but last year this additional duty was placed on this Committee, and it has been an onerous, unpleasant, and extremely difficult matter to ascertain the exact and true condition of the finances of this office—due to many reasons, which we will attempt to show later on.

When we first went to this office, in April, 1904, we were informed that we could conclude our labors "in ten minutes," and were shown the bankbooks and a mere statement of amounts, aggregate, received in that office, and amount paid State Treasurer. On insisting that we came for a real examination, we were begged for time to prepare books, etc. However, your Committee went to work, but soon found, on account of the absence of books and improper entries of cash received, wrong and improper entries made in the books furnished, which had been badly kept. Your Committee, feeling the need of a thorough examination, adjourned, and secured the services of an accountant, Mr. J. C. Hollis, of Gaffney, S. C., and with his valuable assistance, made up a book of every item we could find and was furnished by Mr. R. M. McCown, the Assistant Clerk, said book being now in the possession of your Committee. After adjourning, and before our return with Mr. Hollis, many erasures and corrections were made on the books attempted to be kept. The only way we could do was to handle each Declaration for Charter, Return, Application for Notary Public—in fact, every paper during Mr. Gantt's administration. Seeing that considerable time would be consumed in this examination, we did not feel justified in going back of his term without express authority, so did not do so, but feel now that this should be done by the Committee to be appointed.

In comparing the return of corporators to the charters that were recorded, we found some unrecorded and others erroneously recorded, such as where a charter had been granted in the sum of fifteen thousand dollars, same was recorded as having been issued in the sum of fifty thousand dollars. This work we did not complete on account of a very damaging fire in the office where, principally, all records were kept, and since that time we have been unable to do any such work, for the books were badly injured; hence, such examination was necessarily suspended.

In many cases we found where over-collections had been made, aggregating \$367.55, ranging from fifty cents to \$77.50. There was no evidence that these various items had been returned to the proper parties, but, on the contrary, the Secretary of State informed

us we "had nothing to do with these excess amounts, as that was a matter between himself and the parties sending them." We do not agree to such a proposition. On the book which was supposed to be kept items were left off entirely. To illustrate: Camperdown Mills, chartered April 30, 1904; charter fee, \$100.00, and others.

Improper amounts credited to State: Puckaber Brothers, Charleston, charter fee \$50.00; amount State credited with \$15.00, March 23, 1904. We feel compelled to condemn this carelessness in handling the people's money, and in not keeping proper entries of all moneys coming through this office; also the method that has prevailed in many instances where a credit system has been allowed. To give an instance: The Norris Cotton Mills, charter increased on April 10, 1903; charter fee, \$50.00; amount received after charter issued, \$25.00; and the claim was made that the late Col. D. K. Norris contended that "the office already owed him \$25.00." Either this money is lost to the State, or is a loss to the Secretary of State; at any rate, such practice should be discontinued. There are other instances. These items of over-collections may have been returned, but we have no evidence of same. Your Committee is cognizant of one instance where there has been a refund. The charter was granted on February 23, 1904, and refund made June 23, 1904, after these matters had been called to the attention of this office.

We regret to report that "all moneys" have not been paid over "quarterly" to the State Treasurer as is required by law, same being held, in some instances, considerable time after the expiration of the several quarters.

Your Committee begs to report that, as the report of receipts and disbursements will show, hereto appended, the Secretary of State has deposited in bank several hundred dollars in excess of amounts shown by his books or evidenced by proper vouchers in his office, as having been collected for fees. In this amount, no doubt, is included some of these excess collections, sent by mistake by different parties throughout the State, and which do not belong to the State, but should be refunded to the proper parties when the charters were issued.

We found by mere chance that one item of \$102.50 for charter of the Union Warehouse Company of Columbia, chartered on the 15th day of January, 1902, during Mr. Cooper's administration, was presented for payment in June, 1904, and has not yet been turned over to the State Treasurer, being, we are informed, now

in the office of Secretary of State. There may be other items of Mr. Gantt's predecessor still outstanding, but, as we stated, we did not go back that far.

There were certain books we had in our possession last year concerning the period of Mr. Gantt's predecessor, which, we are informed, were kept by the present Secretary of State, and the following correspondence speaks for itself:

"Columbia, S. C., November 4, 1904.

"Hon. Jesse T. Gantt, Secretary of State of South Carolina,
Columbia, S. C.

"Dear Jesse: In the conversation between you and myself and Attorney-General Gunter, in the Sinking Fund office, about four weeks ago, I stated to you that an account book, to wit: 'The Secretary of State's Account Book of Fees, Vol. 2,' could not be found where (upon your handing it to me some months previously) I had placed it, namely, in the bookcase on the small iron safe in the Sinking Fund office, I showing you where I put it, and you agreeing with me at the time that this would be a safe place to keep it; and that, after diligent search, I could not find it. I further stated in said conversation that this lost or misplaced book, being a book of mere secondary entry, could easily and accurately, though with considerable labor, be reproduced from the record books of original entry, from which the lost book itself was written up or copied.

"These books of original entry were memorandum or 'blotter' books, covering a period from June 1, 1897, to the time when you, as Secretary of State Cooper's chief clerk, introduced in lieu thereof as books of original entry, certain bound books printed in form of several receipts on each page, each receipt being duly numbered, wherein you wrote successively the amount and details as to each fee received by you for the Secretary of State. From time to time, after your introduction of these receipt books, at certain intervals, once or several times a month, you handed to me these receipt books, written up by you, together with a certain amount in checks, moneys, etc., stating that said amount covered the fees written by you in certain receipts in said receipt books; which said certain receipts I entered, or copied, into the said lost book, and signed them, after checking each one up with the amount of checks, etc., turned over to me. The money, checks, etc., received by me at each turning over I promptly deposited in the bank to the credit of M. R. Cooper, Secretary of State. Thus, the lost book upon its debit side is merely

a copy of such of those receipts written by you in the receipt books as were signed by me and written in the lost book. In our said conversation I explained to you that these receipt books of original entry, written up by you and kept in your possession, were necessary to reproduce the lost book in all its detailed entries on the debit side; and that the credit or disbursement side of the lost book could be fully written up in detail from the stubs of the checkbook and checks drawn by Secretary of State Cooper and returned paid by the banks, duly indorsed by the payee. In said conversation, you expressing the opinion that they might be found, I at that time, and on several subsequent occasions, urged upon you the necessity of your at once hunting these receipt books up, and letting me have access to them, so that I could therefrom write up in detail that part of the lost book originally written from them; I suggesting that the work might be rapidly done by Mr. D. W. McLaurin reading the receipts for me to write them into the book being made up. I have, from the other books of original entry, fully reproduced the lost book in every detail of entry, both upon the debit and credit side, for about two years, from its commencement June 1, 1897, to the time when the said receipt books written by you commenced. Beyond this point I need these books of original entry, written and kept by you, to bring the book down to the time, about the middle of the year 1902, when the lost book was closed, and my connection with these fees and feebooks ceased. After waiting several weeks, and failing to get any of the receipt books from you, I have entered (upon the debit side of the book being written up), from memoranda made at the time and in due course of the business, the several and successive total amounts turned over by you to me at said successive certain intervals, as set forth in the foregoing. I know these entries are absolutely correct. After posting these aggregate entries into the new book, they prove out with the bank balances and with the itemized disbursements, and with the Secretary of State's financial statements in his annual reports to the Legislature, and with other checks applied. They must necessarily agree with the several aggregates in the lost book, and with the total amounts of the said certain signed receipts in the said receipt books.

"As thus made up I was prepared to lay these new books before the Legislative Auditing Committee when in session several days ago, had they called for the missing book. These new books are a reproduction of the said lost book, absolutely accurate as to all aggregates, balances, and results, and they show all detailed items

on the credit or disbursement side, and all detailed items on the debit side, except as to those items that the said receipt books of original entries, written up and kept by you, are needed to supply. The lost book may never be called for by the present or any other investigating committee, but whether it be ever called for or not, I am most decidedly and earnestly of the opinion that it is due to me, to you, to Mr. Cooper, and to the public, that you and I make every possible effort to reproduce the lost book, not only in correctness of aggregates and results, as I have already reproduced it, but also in the missing details of items extending over the period of the said receipt books written and kept by you. Now, Jesse, I know in the several conversations we have had upon this subject, you have invariably and time and again remarked that I am taking a great deal of trouble entirely unnecessary in my earnest efforts to reproduce the lost book, expressing in substance the opinion that the Legislative Auditing or Investigating Committee does not want, and would not use if submitted to them, either the lost book or its reproduction. I, however, am decidedly of the contrary opinion above expressed. You are entitled to your opinion and I am equally entitled to mine. Though our opinions so widely differ, our personal and official relations are such that I believe I have a right to ask, and trust that you, without delay, will make an exhaustive and final search for the said receipt books, and let me know the result. If found, I suggest that you turn them over to Mr. D. W. McLaurin, if in the city, for him to read therefrom and me to post in the book being made up, or else I might come into your office and copy them there. All I desire is access thereto, so I may examine and post up each receipt signed by me.

"Some weeks ago I asked you for that Secretary of State's cashbook of fees, which (after my connection with the work ceased) was kept in the Secretary of State's office, covering the last six months of Secretary of State Cooper's term, and which commenced where the lost book ended, as I desired to refer to it; and you told me that you did not know where it was, but thought that it might have been burned in the fire. I also, some weeks ago, asked you for the bank passbooks of Secretary of State Cooper, that had been turned over to you, and you told me you thought they might be found. If you find either this cashbook or the bankbooks, please let me refer to them. I know that the exhaustive and final search I ask you to make for the receipt books of original record, written by you and kept in your possession, may entail work on you, but I am not

asking of you more, nor nearly as much, work as I am rendering in this matter, because after a thorough and exhaustive search for the lost book, I have been busy for over three weeks rewriting up several years of books, and I am now anxious for the opportunity to post said receipt books extending over several years into the book being made up to replace the lost book.

"When the present Legislative Committee, during their first visit this year to the State House, informed me that they expected to examine the Secretary of State's fee accounts for some previous years, I obtained and handed to them this book that has since been lost, and briefly explained to them how it was kept and what period it covered. They handed the book immediately back to me, informing me that they would not need it until the investigations extended back to the period covered by it, or words to that effect. Later, when the Committee was examining the Secretary of State's fee accounts, I carried this book and delivered it to them, and it was in the Committee's possession for about a week or longer, while they were working in the extreme western office of the Secretary of State. Upon the departure of said Committee on that occasion from the city, learning that their investigations had still not extended back to the period covered by said book, I obtained the book from where they had left it, and replaced the book in the same place, in said bookcase on the safe, where later I could not find it.

"Kindly give this matter your immediate attention, and give me a final reply as soon as possible, because, as you know, I have now some leisure in which to post up these books, but very soon my entire time will be occupied in preparing the Sinking Fund's annual report to the Legislature, and in closing up the Sinking Fund books of account for the year. Sincerely,

"D. H. MEANS."

This letter has not been answered, we are informed, and your Committee sent Mr. Gantt the following letter:

"Columbia, S. C., February 11, 1904.

"Hon. J. T. Gantt, Secretary of State, Columbia, S. C.

"Dear Sir: We respectfully ask that you produce for our inspection the four receipt books containing itemized, partly printed receipts, duly numbered, showing fees received by the Secretary of State extending from some time in 1899 to some time in 1902, when these receipts were discontinued; also cashbook kept for the Secretary of State, extending from time the book Secretary of

State's account fees, Vol. 2, was discontinued, and extending to the end of Mr. M. R. Cooper's term of office; also all bankbooks for the year 1903.

"The Committee would be pleased to have these books this afternoon at 3:30 p. m., when it resumes its examination of the office of Secretary of State.

Yours truly,

"THOS. B. BUTLER,

"Chairman Legislative Examining Committee."

"Hon. Thos. B. Butler, Chairman.

"Dear Sir: I am in receipt of your favor of even date, requesting that I furnish your Committee certain books used in the office during the term of my predecessor, Hon. M. R. Cooper. I inclose herewith a letter from Mr. D. H. Means, Clerk of the Sinking Fund, by whom the fees and accounts were kept during this period. Upon receipt of this letter I made a diligent search of the office for the books referred to, but have not been able to find them. I hope that they will yet be found, but on account of its disarranged condition, due to the fire which gutted the room in which all the working records of recent date were contained, I have not been able to find them. The receipts referred to, taken by me as clerk from Mr. Means, who kept the accounts, were usually kept in the large case in the Clerk's office.

"The other books have never been in my personal custody, but were kept by Mr. Means. The bankbooks were kept in one of the desks in the office, and I hand them to you herewith.

"These receipts covered only a short period, were instituted for my personal protection, and were discontinued before the expiration of Mr. Cooper's term. I do not remember some of the conversation referred to by Mr. Means, but they may have occurred, as he suggests.

"It has been a matter of deep personal regret to me that these books cannot be found, and I have made a diligent personal search for them, but without avail.

"I would suggest to you, however, that I have had frequent occasions to verify Mr. Means's accounts from these receipts, and have found them unusually accurate and painstaking. The balances shown by the bank deposits are unquestionably accurate, while the original papers on file in the office, which were issued by you in

lieu of the office books in investigating all collections and disbursements during my term, should enable you to test the accuracy of the office accounts for the period of Mr. Cooper's term.

"Yours truly,

"J. T. GANTT."

The four receipt books which Mr. Gantt, as Secretary of State, was requested to deliver to the Committee are, we are informed, four Secretary of State's feebooks of original entry, written and kept by Mr. Gantt as Chief Clerk of Mr. M. R. Cooper, Secretary of State, wherein he entered with full details each fee received by him for Secretary of State Cooper, extending from some time in 1899 to some time in 1902; the cashbook Mr. Gantt was requested to deliver is a feebook of accounts extending from that time in 1902 when Secretary of State's book account, Vol. 2, of fees closed (and Mr. Means's connection with the fees ceased) to the end of Mr. Cooper's term of office, which, we are informed, was also kept by Mr. Gantt as Secretary of State Cooper's Chief Clerk.

In justice to Mr. Gantt, we beg to state he informed us the reason his books were in bad condition was due to the fact that his time was occupied securing valuable and necessary information for Senator Tillman, to aid him in collecting certain funds from the national government, and we are satisfied he did good work.

The books and accounts since Mr. R. M. McCown has been acting as Chief Clerk have been kept in much better condition, and since our thorough examination in June it is a very easy matter to keep track of the funds and vouchers.

Too much care in keeping the books in this office cannot be spared, for, as will be seen by the following statement of receipts and disbursements during the years of 1903 and 1904, a large amount of money goes through this office.

Amount Received from Predecessor	\$2,670 89

Books Show Balance \$3,229 50
Which shows a balance in banks of \$570.49 over amount the books and vouchers of Secretary of State show.

Under the present law charters are granted on payment of one mill on the dollar up to \$100,000.00, and in a great many instances the State receives only fifty cents, and in some instances as low as five cents, and it costs the State as much to grant one of these small charters as it does one capitalized at \$100,000.00, where the fee is \$100.00. Therefore, we recommend that the law be changed requiring a minimum fee of \$5.00 for any charter granted by the Secretary of State.

There are about eighteen or twenty books, containing the records of corporations, damaged by fire in this office, and, while not destroyed, the bindings and edges have been destroyed, and it is almost absolutely necessary that these books be transcribed. Therefore, we recommend that these records be put in better shape and condition for proper handling and preservation, and that a small appropriation be made to carry this into effect.

Respectfully submitted.

On the part of the Senate.
JNO. G. RICHARDS, Jr.,
THOS. H. RAINSFORD,
On the part of the House.

SECOND READING BILLS.

The following was taken up:

H. 29.—Mr. Toole: A Bill to amend an Act entitled "An Act to amend Section 7 of an Act entitled 'An Act to provide for the election of the State Board of Control, and to further regulate the sale, use, consumption, transportation, and disposition of intoxicating and alcoholic liquors or liquids in this State, and prescribe further penalties for violation of the Dispensary Laws, and to police the same,' approved March 6, 1896," approved February 25, 1894, by striking out and repealing the proviso to Section 7 of the original Act as therein appearing, as to special tax levy and certain forfeitures.

The pending question was the motion by Mr. Gaston to strike out the enacting words.

BILL RECALLED, VOTE RECONSIDERED, BILL
AMENDED AND PASSED.

On motion of Mr. BEAMGUARD, the House recalled the following Bill from the Senate:

H. 413.—Mr. Brantley: A Bill to amend an Act entitled "An Act to amend an Act entitled 'An Act to fix the compensation to be paid to the County officers of the various Counties of the State,' approved 27th of February, A. D. 1902, as to salaries of Coroners in Fairfield, Chester, Hampton, Marlboro, Williamsburg, and Lancaster Counties," approved the 22d day of February, A. D. 1904, by including the word Orangeburg in the title, and by changing the salary in Orangeburg County.

On motion of Mr. TOOLE, the vote whereby the House passed the Bill was reconsidered.

Mr. BEAMGUARD asked and obtained unanimous consent to offer the following amendment:

At the end of Section 1 add the words "York, two hundred dollars."

Which was unanimously agreed to.

Mr. HUTTO asked and obtained unanimous consent to amend as follows:

Page 3, Section 1, strike out after "dollars," in line 10 of original Bill, to the first word on line 13 as follows: "Provided that all costs accruing to magistrates for holding inquests in said County shall be paid out of said Coroner's salary."

The Bill, as amended, was read the third time and ordered sent to the Senate.

PETITIONS.

The following Petitions were presented:

Greenville, S. C., February 6, 1905.

*To the Honorable Members of the House of Representatives of
South Carolina:*

The undersigned cotton mill operatives of Greenville County do earnestly petition your honorable body to defeat any bill that has been or may be introduced in the Legislature providing for a reduction in the hours of labor in cotton mills. A very large majority of cotton mill operatives are paid by the piece, and a reduction in the running time from eleven hours to ten hours a day would reduce the production of the machinery ten per cent., and would therefore

simply mean a reduction of ten per cent. in our pay, and such reduction would work a hardship on all cotton mill operatives.

Respectfully submitted.

COMMUNICATION.

Gentlemen of the General Assembly:

I beg to submit to you herewith a full report of the finances of the office of the Secretary of State, and a detailed itemized statement of all official receipts and disbursements during my entire term in office. I beg to inform you that I have this day placed in the hands of the State Printer, as a supplemental report to the General Assembly, a full, accurate, and complete list of all persons or corporations who have paid any fees to the office, which in its every detail proves the statements handed you herewith to be correct.

In doing so, I beg to make the following statement in reply to the report of the Committee appointed to examine the books and accounts of my office:

I have been continuously since the appointment of the Committee willing and anxious to make up and present this statement to them, having offered to do so upon their first visit to the office, but was

informed that they desired the papers of the office turned over to them without any checking, verification, or statements, in the condition in which they were at the time. Presuming the Committee competent to come into the office, take the books and make up a correct statement of its affairs, the entire papers and books of the office were turned over to them; they were furnished with a key, which the Chairman retained for three months, and which was used to gain entry to the office when none of the clerks or employees thereof were present. This was permitted to allow the fullest and freest opportunity for full and comprehensive investigation of the office. During most of the time of the first investigation I was confined to my house by sickness. During the progress of this investigation reports were brought to me of statements by members of this Committee of a shortage in the office. Upon the conclusion of the investigation, which was during the week prior to the filing of pledges by candidates for State offices, I secured an opportunity to state to the Committee the reports I had heard, and asked that they state to the public what they had found. In response to this request the Committee published a communication, in which it was asserted that no books were kept, which was false, and that they had collected certain vouchers from which they had made up a set of books, which was equally untrue, as there is not now and never has been any "vouchers" to be collected, and the original declarations and returns of corporators could not be so designated, and principally from these I understood the Committee had made up its statements. As I was assured that the Committee had found nothing which they especially criticized, I supposed the statement they had secured to be accurate. I had repeated assurances given me that nothing wrong had been found. Consequently, my astonishment at the remarkable statements made therein was as profound as was my surprise at the partial, incomplete, and inaccurate statement of the financial affairs thereof.

When reduced to its logical conclusion and freed from the insinuation and inuendo in which it is clothed, the report charges that no adequate books are kept, or proper record of the receipts and disbursements of the office, and that the management of the office has been deficient. The only reply which it is in my power to make to this charge is the rendition at once of a full statement of every financial transaction of the office, properly balancing the cash found on hand during my term of office. I assert to be true that, though prepared upon less than twenty-four hours' notice, this statement

is substantially accurate, and I will forthwith and immediately resign as Secretary of State if I cannot prove to the satisfaction of any competent and unprejudiced bookkeeper that it is a satisfactory statement of the condition of the office, and that the statement of the Committee purporting to be such is not a true statement of its affairs, and contains many errors.

Replying to the several remarkable assertions of the Committee, I wish to quote them as follows:

"When we went into the office we were informed that we could conclude our labors in ten minutes." I deny absolutely and unequivocally that I made any statement at all in reference to the time it would require to make the investigation, to any member of this Committee.

"On insisting that we came for a real examination, we were begged for time to prepare books."

I neither begged nor cared for any time whatever; I suggested that I would like to check over the entries that had not been checked, for possible errors; I suggested that the examination would be facilitated if the Committee would permit me to make a complete statement of its affairs, showing proper balances. Both offers were declined, and evidently misconstrued. As a result of the refusal of the Committee to accept any help or suggestion in their work, nothing whatever was accomplished during the two entire weeks, and when Hollis, the expert, came, everything that had been gone over was rechecked.

"Many erasures and corrections were made on the books."

Mr. McCown says that he made one or two corrections, with the knowledge and, he thought, permission of the Committee.

"A charter had been granted in the sum of \$1,500.00, same was recorded as having been issued in the sum of \$50,000.00."

This has never been called to my attention, and I have no idea to what is referred. I would suggest that a record must have been accessible to them which showed the proper capital stock.

"In many cases we found where over-collections had been made, aggregating \$367.55."

I beg to say that, owing to the change in the law for recording certain papers, reducing the fee fifty cents, the reduction has been frequently overlooked by applicants for charters, in spite of the adoption of every means by the office to apprise the public of it. As every declaration on which it is paid is followed generally in two or three days, with a return upon which a further fee is payable,

it has been the practice of the office to deposit the additional fifty cents to the credit of the official account of the office, to be applied on the return fee. In some cases the return has been delayed, and in others it is never made. There is now unrefunded of these matters the sum of \$41.25, which is in bank to the credit of the State.

"Improper amount credited to the State: Puckhaber Brothers, Charleston, S. C., charter fee \$50.00; amount State credited with, \$15.00."

It was discovered by the Committee that the office had failed to detect an error in computing the proper fee for the charter of this concern, made by John C. Mehrtens, Esq., their attorney. Only \$15.00 had been paid the office, as it was so entered. When the Committee called attention to the error, the attorneys were wired, and immediately remitted the balance of \$35.00, which was entered on the books as soon as received, and the matter explained to the Committee.

"All moneys have not been turned over quarterly to the State Treasurer."

It is true that I have directed that funds be not checked out of the bank until ample time has been allowed for the collection of all checks, etc., deposited. Sometimes a check which is received by the office is not paid when presented, and confusion in our accounts arises therefrom. For instance, on March 3, 1903, a check given by Thomas B. Butler upon the Carolina National Bank for \$300.00 was refused payment when presented, and the amount was not finally collected for about three months. It would have been inconvenient to have turned that over to the State Treasurer, even though the office books showed that it was chargeable to us.

"We found by mere chance that one item of \$102.50 for charter of the Union Warehouse Company, of Columbia, chartered on the 15th day of January, 1902, was presented for payment in June, 1904, and has not been yet turned over to the State Treasurer."

It is true that I discovered that, through some neglect, there had been a failure to collect the fee for this charter. I demanded its payment, and a check was given therefor, which was held for final determination as to its proper disposition. This check is properly accounted for.

"There were certain books we had in our possession last year, concerning the period of Mr. Gantt's predecessor, which we were informed were kept by the present Secretary of State."

"The present Secretary of State" wishes to say that he has never, except for a short period at the beginning of his own term, kept any of the cash accounts of the office. During Mr. Cooper's term these accounts were kept by Mr. D. H. Means, and the record books during this period have never been in the personal custody of the present Secretary of State.

When fees were paid to the office to him, they were turned over to Mr. Means, whose personal receipt was taken therefor. Prior to this time no receipts were taken, the same practice being in vogue. He regarded Mr. Means's letter as official notice to him of the loss of the books, from a subordinate to his superior officer.

The statement is made, however, that the report of the Secretary of State and the original papers and records, which were used by the Committee to verify the liabilities during the present term, can be made to serve the same purpose, even in the absence of this book, while deposit at the banks and payments to the State Treasurer will show all disbursements.

Again reverting to the general features of this report, I wish to say that I requested an opportunity to test the accuracy of the figures made up by the Committee, and to explain any cause for criticism that appeared to them, but was refused. Without having seen the totals arrived at, I challenge the accuracy even of the addition in the purported statement which was made up. It does seem that men who proclaim so loudly their jealousy of the people's money should at least put enough value upon the character and reputation of a man that they would at least refrain from imputing to him that which is discreditable until they had observed the caution of ascertaining facts to rest their assertion on, and when criticizing the efficiency of another to be certain of their own.

Respectfully submitted,

J. T. GANTT,
Secretary of State.

Which was agreed to.

TABLED AND WITHDRAWN.

On motion of Mr. D. O. HERBERT, the following Bill was tabled, and permission was granted to withdraw it from the files of the House:

H. 527 (S. 257.—Mr. Raysor): A Bill to require the qualified electors of the Town of Fort Motte to hold a second municipal election.

And a message was sent to the Senate accordingly.

SECOND READING BILLS.

The following Bill was taken up:

H. 8.—Mr. Toole: A Bill to amend Section 321, Vol. II, Code of Laws, 1902 (Criminal Code), so as to reduce day's work from eleven to ten hours.

Mr. FAUST moved to strike out the enacting words.

Pending discussion, the House adjourned.

ADJOURNMENT.

At 10:22 p. m. the House, on motion of Mr. M. W. WALKER, adjourned.

THURSDAY, FEBRUARY 9, 1905.

The House assembled at 10 a. m.

The Clerk called the roll.

The SPEAKER PRO TEM. took the chair, and, a quorum being present, the deliberations were opened with prayer by the Chaplain.

The Clerk proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. RILEY, the further reading of the Journal was dispensed with, and it was confirmed.

The SPEAKER PRO TEM. called, in alphabetical order of Counties, for Petitions, Memorials, Presentments of Grand Juries, Returns of Commissioners, and such like papers, and for Resolutions, Bills, or Motions.

On motion of Mr. BANKS, the call was dispensed with for this day.

RESOLUTION.

H. 587.—COMMITTEE ON PRIVILEGES AND ELECTIONS: A Resolution, authorizing the Clerk to make certain indorsements on a substitute Bill as were on the original.

Whereas, A Bill entitled "A Bill to prescribe the mode of conducting any primary, or other such election, held in this State for the purpose of nominating or selecting a person or persons to be afterwards elected to any office in this State, and to prescribe penalties for a violation thereof," was introduced by Mr. Gyles on the 26th day of January, which Bill was read one time on the 26th day of January, and having been referred to the Committee on Privileges and Elections, and said Bill having such errors on the last page that it was deemed best to rewrite same to offer as a substitute, and said original page having been lost or mislaid, after the annexed copy thereof was made;

Therefore, be it Resolved, That the Clerk, by unanimous consent, be empowered to place upon this said substitute page the same indorsements as were on the original, and that the substitute then be added to the original Bill, and be again referred to said Committee on Privileges and Elections.

Considered immediately, and agreed to.

ADDITION TO REPORT OF COMMITTEE APPOINTED TO EXAMINE BOOKS OF CERTAIN STATE OFFICERS.

Mr. RICHARDS presented the following letter as a part of the Report of the Special Committee appointed to examine the books of certain State officers, which letter was omitted from said report, but was intended to precede the letter quoted therein from Mr. D. H. Means to the Hon. Jesse T. Gantt:

"Columbia, S. C., November 17, 1904.

*"Hon. T. Both Butler, Chairman Legislative Examining Committee,
Gaffney, S. C.*

"Dear Senator: Yours of 14th instant to hand, and I appreciate your prompt attention. I inclose a communication from me to Secretary of State J. T. Gantt, former Chief Clerk of Mr. (Secretary of State) M. R. Cooper. A careful reading of it will explain most of the matter. Failing to obtain the said receipt books of original entry, written and kept by Mr. Gantt, or a satisfactory reply, after several earnest oral requests by me covering about four weeks, I, on the 5th of November, made the inclosed written demand upon him for them. On November 7th I went into his office, and finding him there, he stated to me: 'I have received your communication, and will reply in writing.' I replied: 'I hope you will do so within the next day or two.' Mr. Gantt replied: 'I will, right away.' I have now waited ten days since this promised reply in writing, 'right away.'

"Nearly two weeks have elapsed since the written demand, and I have received no reply. From the first, Mr. Gantt's conduct has been one of procrastination, and putting off. He has never said the receipt books of original entry could not be found, and has most frequently said that 'Rich,' the colored porter, could look them up, or look for them, and has constantly said that I am taking much trouble unnecessarily in my endeavor to reproduce the lost book, etc., etc. My views are expressed in my letter to Mr. Gantt.

"I desire, when you come down, to invoke the aid of your Committee to obtain these books of original entry if possible, so that the lost book may be reproduced in all its details for Mr. Cooper's four years' term, as it has been reproduced during two years of Mr. Tompkins's term from Mr. Tompkins's books of original entry.

"I also wish your Committee to pass upon the matter and the reproduction of the book before you go out of office. I am especially desirous for your Committee to close this matter up, because some circumstances coming within your Committee's personal knowledge during your heretofore examination (to which I will call your Committee's attention when I see you) have an important bearing upon the loss of the book.

"The 28th of November, suggested by you, will be soon enough, if we will get down to work on that day. My time, information, and labor will be at the service of the Committee, and I hope the

matter can be closed up in time for your report to the Legislature and before my heavy work in closing up the Sinking Fund books and preparation of Sinking Fund Report to Legislature commences.

"If I get these receipt books from Mr. Gantt I will have to post up for your Committee's convenience. So I shall expect your Committee to arrive on the 28th of November, if I hear nothing from you to the contrary.

"You requested me to write you confidentially, and I have done so, but have other facts to relate when I see you. As I before stated, please just come down as if to do the work on the past quarters.

"Yours respectfully,

Received as information.

"D. H. MEANS."

So the motion was lost.

Mr. PATTERSON moved to reconsider the vote whereby the House refused to recommit the Bill, and to lay that motion on the table.

Which was agreed to.

The Bill was then read the third time, passed, and ordered sent to the Senate.

REPORT OF SPECIAL COMMITTEE ON PENSION LAW.

To the Honorable General Assembly:

Your Committee, to whom was referred the several Bills amending the Pension Law, beg leave to report that they have carefully examined same, and made a thorough examination of the Pension Law, and are of the opinion that the present law, as arranged by classes, appears to be equitable and just, and would recommend that no change be made in the same.

We realize that the general opinion prevails that there is an inequality existing in the widows' classes—No. 3 and No. 4—No. 3 receiving \$48.00 and No. 4 being prorated. It must be borne in mind that there are only 729 widows in the preferred, or \$48.00, class, and that they are the widows of Confederate soldiers who died in service during the war. This class of widows, having lost their husbands, lost all, and, like the old soldiers, are rapidly passing away, and in a few years none will be left. To combine the classes would be of little appreciable benefit to Class C, No. 4, and would be a great hardship to the widows of our soldiers who lost their lives during the war.

Your Committee would recommend that all Bills now before the House, or pending, be indefinitely postponed.

Respectfully submitted.

D. J. BRADHAM,
M. P. TRIBBLE,
J. W. ARDREY.

The report was considered immediately, and adopted.

MESSAGE FROM THE GOVERNOR

TRANSMITTING THE BATTLE FLAG OF McINTOSH'S BATTERY.

State of South Carolina,
Executive Chamber,
Columbia, S. C., February 14, 1905.

SPECIAL MESSAGE No. 6.

To the Gentlemen of the General Assembly:

I have the honor to present to you, in behalf of the Pee Dee Light Artillery, the battle flag of McIntosh's Battery. The historic flag is presented to the State of South Carolina by the veteran survivors who bore it in battle, asking that it be preserved in the archives of their State. Accompanying this flag is a historical sketch of the Pee Dee Light Artillery, the presentation by the committee appointed from McIntosh's Battery, and a brief sketch of the flag and its career.

I am glad to have the honor of transmitting this flag and these sketches to your honorable body, feeling confident that the wish of the brave survivors will find a ready response in your hearts, and that this cherished gift will be placed among our most honored archives, to be handed down to future generations.

I have the honor to be respectfully yours,

D. C. HEYWARD,

Governor.

Governor Heyward:

We have the honor to deliver to you the flag of the Pee Dee Light Artillery, composed of men from Darlington District, South Carolina.

This act on our part is authorized by the accompanying resolution, unanimously adopted by the survivors of that command, at their last annual reunion, July 21, 1904.

Thinning ranks and the increasing infirmities of old age have driven us to seek a safe place to deposit it before we all pass away.

And in discharging the duty assigned to us by our comrades, we respectfully present a brief sketch of the flag, together with a printed history of the command, which we venture to hope may furnish some grounds for the belief we cherish that the colors faithfully followed by her sons throughout the entire war may be deemed worthy by the State of a place in her archives.

At the annual meeting of the survivors of the Pee Dee Light Artillery, held July 21, 1904, the following resolution was unanimously adopted:

Resolved, That the flag be presented to the State, and that E. Keith Dargan, I. F. Reddick, J. E. Pettigrew, J. L. Napier, and J. W. Brunson are hereby appointed to deliver it.

JOS. W. BRUNSON, Secretary.

HISTORY OF THE FLAG.

The flag (McIntosh's Battery) of the Pee Dee Light Artillery, first organized as the Pee Dee Rifles, Company D, First (Gregg's) Regiment, S. C. V., Walker's (later Pegram's) Battalion of Artillery, A. P. Hill's Division, Jackson's Corps, Army of Northern Virginia.

It was presented at Suffolk, Virginia, in 1861, by Col. Maxcy Gregg, in behalf of Miss Louisa McIntosh and other ladies of Society Hill, S. C., and was received by Capt. D. G. McIntosh with a soldier's pride.

It was an inspiration in the following battles, besides numerous other engagements of minor importance: Seven Days Around Richmond, Second Manassas, Ox Hill, Harper's Ferry, Sharpsburg, Fredericksburg, Chancellorsville, Gettysburg, Spottsylvania, Second Cold Harbor. After this battle the Battery was transferred to James Island, S. C., where it remained until a short time before the City of Charleston was evacuated.

The guns were surrendered at Greensboro, N. C., but the flag was saved by the Guidon, R. C. Nettles, who escaped with it concealed under his jacket, and restored it to the hands of one of its fair donors, Miss Louisa McIntosh, in whose custody it remained until 1878, when she presented it to the survivors of her brother's old Battery.

Since that year they have met in annual reunion under its tattered folds, to do honor to its fair donors, its gallant commanders, and to the brave men who died to defend it.

But thinning ranks and the rapidly advancing infirmities of old age have warned them to seek a safe place to deposit it before they all pass away.

Hence at their last reunion it was resolved to offer it to the State, in the hope that it might be deemed worthy of preservation in her archives.

We were appointed a committee to deliver it.

E. KEITH DARGAN,
I. F. REDDICK,
J. E. PETTIGREW,
J. L. NAPIER,
J. W. BRUNSON,

Committee.

Very feeling and appropriate remarks concerning this historic battle flag and its acceptance for preservation by the State were made by Messrs. LAWSON, KERSHAW, GRAY, J. P. GIBSON, NASH, DEVORE, HARRISON, and BRADHAM.

On motion of Mr. NASH, a rising vote was taken, and the trophy was unanimously accepted.

REPORT OF COMMITTEE TO INVESTIGATE BOILER EXPLOSION.

The Committee appointed to investigate and report upon the injury to one of the boilers connected with the heating plant of the State House, respectfully submit the following report:

The Commission met on the 25th day of January, 1905, and organized by the election of Senator John K. Hood, as Chairman, and J. C. Tadlock, as clerk and stenographer.

It was agreed to allow the stenographer \$2.50 per day for his services, including typewritten copies of the testimony for each member of the Committee.

The Commission was in session parts of ten days and took a mass of testimony, which has been filed in the office of the Attorney-General.

It appears from the testimony, and the Commission find as facts the following:

There are four boilers in the basement used for generating steam for heating purposes. These four boilers are connected with each other, in battery, as it is termed. On the evening of January 19, 1905, they were in charge of the following employees: J. M. Fudge, E. J. Harrison and U. R. Brooks, Jr. Fudge and Brooks were employed by the State House Commission, and R. R. Lingley and Matthew Reagan were employed by the contractors who were engaged in installing the plant. The heating plant had not been turned over and accepted by the State House Commission.

About 9 o'clock p. m. of January 19, 1905, R. R. Lingley and U. R. Brooks, Jr., were in charge of the boilers. They banked the fire in all of the boilers in commission that day, and left the basement. The door to the basement was left open, as it had been for several weeks. The next morning, about 6 o'clock, Fudge, one of the employees, the fireman, went into the basement to fire up for the day. He found two or three gauges of water in the water gauge to the boiler, indicating that there was plenty of water in the boiler. He did not try the "try cocks" on the side of the water gauge to confirm the indication in the water gauge. He then fired up the other three boilers, not intending to use the injured boiler that day. As soon as communicating water and steam from these boilers rushed into the injured boiler, streams of water flooded the fire and floor of the injured boiler and spread out upon the basement floor. Upon examination it was found that the flues of the boiler were badly cracked, through which cracks the water and steam had rushed. It was found also that the water gauge cock was closed which cut off communication between the boilers and the water gauge, causing the water in the water gauge to stand stationary therein, and giving a false indication as to the height of the water in the boiler. This he would have discovered if he had tried the "try cocks."

If it be a fact that this water gauge cock was closed, as testified to by Fudge, and that the water in the boiler was low, this would lead to the suspicion that the blow-off cock had been opened and the water allowed to run out of the boiler by some evil-disposed person; the water gauge cock being closed to mislead the fireman as to the amount of water in the boiler. The Commission, however, has found no other evidence of ill design.

While the fireman was negligent in not using the additional precaution of trying the "try cocks," we do not think that such negligence was the cause of the injury. The cracks in the flue, with one exception, were horizontal and almost upon a common line. The opinion of experts is that they were caused by the receding of the water in the flues and the effect of fire upon the flues not wholly covered by water. This probably occurred some hours before Fudge, the fireman, came on duty.

The failure on his part to ascertain the height of water in the boiler, and his allowing the water and steam from the other boilers to rush in, simply disclosed the accident that had occurred some hours before.

We have been unable to ascertain any evidence upon which to found a definite opinion that the accident was due to design.

We desire to impress upon the officer in charge of the property to take greater care in closing the approaches to the basement.

Respectfully submitted,

Be it resolved by the Senate, the House of Representatives concurring:

SECTION 1. That a Joint Committee, consisting of three Senators and four Members of the House of Representatives, be appointed by the presiding officers of the respective Houses to investigate the affairs of the State Dispensary.

SEC. 2. That said Committee be, and is hereby, empowered to send for papers and persons, to swear witnesses, to require the attendance of any parties whose presence shall be deemed necessary, to appoint an expert accountant and stenographer, and to investigate all transactions concerning said Dispensary and its management, and to make testimony either within or without the State, and shall have access at all times during their service to all the books and vouchers and other papers of said institution, especially in investigating the following facts:

(a) Whether or not it is a fact that houses represented by agents who are near relatives of the members of the Board of Directors, receive large orders at each purchase.

(b) Is it a fact that members of the Board of Directors are, or have been, agents for certain wholesale houses from which large purchases are made?

(c) Is it a fact that parties to whom large orders are given are not wholesale dealers but brokers, and that the orders are filled by third persons, thus making the State pay the commissions of the middleman?

(d) Was it necessary to purchase the large quantity of liquors ordered in December, 1904, to fill demands and especially the new and fancy goods purchased which is unknown to the trade?

(e) Are the extraordinary heavy purchases made necessary to the best business interest of the Dispensary system?

(f) What is the financial standing of the business, and is it run on the best principles for the interest of the law as originally passed and amended?

(g) Is it a fact that the State, through the Dispensaries, is violating the Constitution of 1895, in that it is selling whiskey in less quantities than one-half of one pint?

(h) Is it a fact that the State is selling 5's in case goods to its customers and charging them for one quart?

(i) Is it a fact that certain agents are traveling over the State and offering special inducements to County Dispensers to "push" certain brands of liquors, and, if so, is it a fact known to the members of the State Board of Directors?

(j) Is it a fact that certain requirements of the law are dispensed with by the County Dispensers by order of, or by the consent of, the members of the State Board of Directors?

(k) Has the whiskey which has been recently purchased been ordered out from the dealer, or is it held in reserve for future delivery?

(l) What is the indebtedness of the Dispensary for liquors which have been bought but not delivered?

(m) And any and all other matters relating to the management of the State Dispensary, and of any official or person in relation thereto.

(n) Is it, or not, a fact that excessive freights have been paid to railroads for transporting liquors into the State, when said liquors could have been shipped into the State by water at less cost to the State?

(nn) Whether there is any warrant of law or authority for the establishment and conduct of what is commonly known as "Beer Dispensaries," as they are now and have been conducted.

SEC. 3. That said Committee may at any time they may deem it advisable call to their assistance any of the State officers or employees of the State Dispensary, whose duty it shall be to render the said Committee any reasonable service that may be required of them within the scope of its functions as prescribed by these Resolutions.

SEC. 4. That the said Committee shall convene as soon after the adjournment of this session of the General Assembly as practical, and shall organize by electing one of their number as Chairman, and shall report its findings to the next session of the General Assembly. That said Committee shall receive the same per diem and mileage as members of the General Assembly, and that the sessions of said Committee be open to the public.

SEC. 5. That nothing herein contained shall be construed to deny the said Committee the power to apply at any time to the General

Assembly for such other power and authority as the circumstances arising during this investigation may seem to require.

SEC. 6. That said Committee shall have the right to punish for contempt as Courts of Common Pleas and General Sessions.

SEC. 7. That said Committee shall have a Marshal to serve its processes and keep order at its sessions, and his pay shall be fixed by said Committee. The pay of the witnesses shall be the same as that of witnesses in the Court of Common Pleas for Richland County, and all expenses shall be paid on the warrant of the Chairman of said Committee by the Liquor Commissioner out of the general Dispensary fund and charged as Dispensary expenses.

SEC. 8. That said Committee be, and is hereby, empowered to send for papers and persons, to swear witnesses, to require the attendance of any parties whose presence shall be deemed necessary, to employ expert accountants and stenographers and any other person or persons the Committee may consider necessary in the ascertainment of any fact or facts pertinent to this inquiry; and said Committee is hereby authorized and empowered to investigate and inquire into all transactions connected with said State Dispensary and its management or control at any time in the present or past, and to investigate any and all purchases, sales, shipments, contracts, or other like transactions; and the personal connection, if any, of any member or members of the State Board of Control, or, the State Liquor Commissioner, or any other citizen or official of this State, in the present or past, with any other corporation, concern or individual contracting with, or supplying any spirituous or intoxicating liquors, or other goods or commodities to said Board or Commissioner, or to the State, to take testimony either within or without the State; and to have access to all the books and vouchers and other papers of said institution or of any officer or employee thereof.
